# Preface

The present publication comprises a descriptive catalogue of the Tibetan texts found from the Khara-khoto sites and a list of Tibetan texts found from the Etsin-gol site kept in the Stein Collection of the British Library.<sup>i</sup> In contrast to the Tangut and Chinese texts from Khara-khoto, the Tibetan texts from Khara-khoto and Etsin-gol have not been paid due attention and remain unrecognized. They are also less utilized and poorly studied compared to other Tibetan texts unearthed from other ruined sites in Central Asia, e.g., Dunhuang, Mīrān, and Mazār Tāgh. The primary purposes of the present publication, therefore, are to present an overall view of the Tibetan texts from the Khara-khoto areas and to provide reliable data for further researches.

I started my cataloguing project of the Tibetan texts in the Stein Collection in 1990. My primary targets were the Tibetan paper documents and woodslips from Central Asia.<sup>ii</sup> But while extensively searching for all the relevant Tibetan texts, I encountered the Tibetan texts from Khara-khoto and Etsin-gol from Stein's third expedition. They remained uncatalogued and unpublished. I thus promised Graham Shaw and Michael O'Keefe of the British Library to catalogue these texts as well. Since then, twenty-five years have passed. It is now a great pleasure that we can eventually publish the catalogue.

While doing a preliminary research on the Khara-khoto texts, I realized that the majority are Buddhist texts dating from after the post 12<sup>th</sup> century, which are not really within my specialization. I then asked Maho Iuchi, a specialist in Buddhist studies especially early Kadampa texts, for cooperation. Iuchi visited and examined not only the texts in the Stein Collection, but also the Kozlov Collection in St. Petersburg and the collections in China where Tibetan texts from Khara-khoto are housed. Iuchi further identified several Buddhist texts and succeeded in dating them. As a result, we have reached a basic understanding of the dates and characters of the Tibetan texts from Khara-khoto and Etsin-gol.

The Tibetan texts from Khara-khoto are contemporary to the Tangut and Chinese texts and they date to from the 11<sup>th</sup> to 15<sup>th</sup> centuries, while those from Etsin-gol are much later, dating from the 16<sup>th</sup> to even 20<sup>th</sup> centuries. The latter also include many blockprints of the same Buddhist texts. We thus decided to focus more on the Khara-khoto texts. In this volume, we first provide a descriptive catalogue of the Khara-khoto Tibetan texts and their classification. We then provide a list of the Etsin-gol texts to serve as the basis for further investigation.

We also included photos of all the Khara-khoto texts and several Etsin-gol texts as examples. Although the photos included here are black and white, the digital color photos will soon be available in the IDP website. We hope that this publication will attract the attention of other researchers to this important collection and make it known and accessible.

The publication at hand is the second volume of a new series of publications, entitled “Old Tibetan Texts from Central Asia” in the Toyo Bunko. The series aims at publishing important texts, data, research results and catalogues concerning Old Tibetan texts from various ruined sites in Central Asia, including the Dunhuang caves, Mīrān, Mazār Tāgh, Khara-khoto and Etsin-gol.

The “Old Tibetan Texts from Central Asia” series constitutes part of the general series of publications of Tibetan studies in the Toyo Bunko, entitled “*Studia Tibetica*,” which has been edited by the Tibet research group in the Toyo Bunko since 1967 (present editor in chief: Chizuko Yoshimizu). We wish to acknowledge Professor Yoshimizu for her generous advice and help in publishing this volume.

In the course of compiling the catalogue, we have received help and advice from colleagues. We are deeply indebted to Kazuo Kano for identifying many Buddhist texts. We are also grateful to Shintaro Arakawa for identifying a Tangut text. My students, Eri Hatahara and Misaki Fujii, sorted out paper documents for our research.

It remains to express our sincere gratitude to the British Library and the International Dunhuang Project (Director: Susan Whitfield) for the permission to include the reproduction of the photos in this volume. We are particularly grateful to Sam van Schaik of IDP for his generous help and cooperation. We are also deeply indebted to Vania Assis (conservator) and Josef Konczak (photographer) for their vital practical help in the process of reproducing the photos.

Tsuguhito Takeuchi  
*Kobe City University of Foreign Studies*

---

<sup>i</sup> For the general description of the Stein Collection of the Old Tibetan texts, see Takeuchi *OTM*: xv-xxviii.

<sup>ii</sup> Catalogue of the paper documents was published as Takeuchi *OTM* in 1998, while catalogue of the woodslips is in preparation.

# Introduction

## – Tibetan Texts from Khara-khoto and Etsin-gol –

### Introduction

In the early twentieth century, a large number of manuscripts and wood-block prints written in various languages were discovered at the ruins of Khara-khoto and Etsin-gol in the Etsin-gol delta of Inner Mongolia in China, on the route connecting the Gansu Corridor and Mongolia (see Map).

Khara-khoto was a fortified town of the Tangut state (1038–1227), known in Tibetan as *Mi nyag* and in Chinese as *Xi xia* (西夏). The unearthed texts include, in addition to those written in Chinese, Uighur, Mongol and Tibetan, numerous Tangut manuscripts and prints. They attracted the attention of scholars as the most important source for deciphering the Tangut script and for uncovering the history of the Tangut state together with contemporaneous Chinese texts.<sup>1</sup> Subsequently, there appeared numerous studies of the Tangut and Chinese texts from Khara-khoto.<sup>2</sup>

In contrast, the Tibetan texts from Khara-khoto and Etsin-gol have not been paid due attention and remain unrecognized except for a few publications.<sup>3</sup> They are also less utilized and poorly studied compared to other Tibetan texts unearthed from other ruined sites in Central Asia, e.g., Dunhuang, *Mīrān*, and *Mazār Tāgh*. Nevertheless, these Tibetan texts from Khara-khoto and Etsin-gol are unique, in that they are extremely rich in variety. Their dates range from the late 11<sup>th</sup> to the 20<sup>th</sup> centuries. Some are written in the Old Tibetan style, some in the Classical Tibetan style, some include Mongolian texts, and some are prints. Their forms also vary, including pothi, scroll, concertina, and codex. Thus, they provide evidence for various stages of the development of Tibetan writing styles during that 1000–year period.

In what follows, we would like to give an overview of the Tibetan texts from Khara-khoto and Etsin-gol and discuss their significance in the historical development of the Tibetan literary tradition and Tibetan Buddhism in Central Asia.

---

<sup>1</sup> Among the Chinese texts, the dated administrative documents are also considered to be important historical sources for the 12<sup>th</sup> century Song Dynasty (e.g., cf. Ito 2012).

<sup>2</sup> To list only the facsimile editions of the texts: The Chinese and Tangut texts in Russia, Kozlov Collection, have been published in *Russia K.K. Mss* (for more details on bibliographical abbreviations, see the Abbreviations and Bibliography); the Tangut texts in the British Library, Stein Collection, have been published in *BL K.K. Mss*; the Tangut texts collected in China have been published in *China Tangut Mss.*; the Chinese texts in China have been published in *China Chinese Mss 1* and *China Chinese Mss 2*.

<sup>3</sup> Photos of several texts were published by Stein in *Innermost Asia* (Stein *IA*: CXXXI–CXXXVII). Recent studies are Takeuchi (1998, 2002, 2004, 2007), Kano (2008), Iuchi (2011) and Shirai (2004).

## 1. Expeditions and Collections

The two major collections in Europe and the collections in China (Inner Mongolia) are as follows:

- A) The Stein Collection in the British Library
  - Stein's third expedition (1913–1915)
  - 1061 items (285 from K.K.; 776 from E.G.)
- B) The Kozlov Collection in the Russian Academy of Sciences in St. Petersburg
  - Kozlov expedition (1907-1909)
  - 81 +  $\alpha$  items
- C) Collections in China<sup>4</sup>
  - Inner Mongolia Institute of Archaeology – 41 items<sup>5</sup> (1983–1984)
  - Inner Mongolia Etsina Archives – 38 items<sup>6</sup>

**A) The Stein Collection:** The Khara-khoto and Etsin-gol texts in the Stein Collection were found and acquired by Stein's third expedition. The majority of the Tibetan texts were originally stored at the India Office Library (IOL).

When Takeuchi first searched for these texts in IOL in 1990, they were bound in seven volumes together with two Tangut texts. In addition, a considerable number of texts were placed in one box with the title "Stein 3<sup>rd</sup> Expedition." A few more texts were also found in the IOL storeroom. All of them have since been conserved in new boxes.<sup>7</sup> They retain the old requisition number "IOL Tib M."<sup>8</sup> Also, Takeuchi found one text with a site number 'K.K.' in the Or. 8212 sequence<sup>9</sup> and one wooden tablet with a site number 'E.G.' in the "IOL Tib N" sequence.<sup>10</sup> In the present catalogue we count a total of 1061 texts.

In addition to the requisition numbers, the texts in the Stein collection bear site numbers beginning with K.K. (= Khara-khoto) or E.G. (= Etsin-gol) assigned by Stein himself, as we will see in the next section.

**B) The Kozlov Collection:** Peter Kuz'mych Kozlov made the first scientific excavation of the Khara-khoto sites in 1908 and 1909. Kozlov made a second visit to Khara-khoto in 1926. During the expeditions Kozlov acquired vast amount of texts and artifacts, which were sent to and kept in St. Petersburg.<sup>11</sup>

The Tibetan texts are kept at the St. Petersburg Branch of the Institute of Oriental

---

<sup>4</sup> Beside these three expeditions, several Chinese archaeological expeditions were sent to the Khara-khoto sites in 1927, 1962–63, 1976, and 1979. They acquired a number of texts, but whether any Tibetan texts were found or not remains unclear.

<sup>5</sup> Published partly in Takeuchi 2008 and later in full in *China Miscell. Mss.*

<sup>6</sup> Maho Iuchi visited the Archives in 2005 and examined 38 Tibetan texts (Iuchi 2011: p. 36).

<sup>7</sup> With the stack location numbers "IOL Tib M Box 01–12."

<sup>8</sup> Takeuchi *OTM*: pp. xix–xxi. IOL joined the Oriental Collections in 1991 to form the Oriental and India Office Collections, which later changed into Asian and African Studies, the British Library.

<sup>9</sup> K.K. II. 0279. sss. = Or. 8212/ 1914 = Text 674 in Takeuchi *OTM*.

<sup>10</sup> E.G.020 = IOL Tib N 2235. The item will be relisted in Takeuchi's catalogue of woodslips.

<sup>11</sup> Details of the Kozlov expeditions are described in Kozlov 1923 and Kozlov's diary (Дневник Монголо-Сычуаньского путешествия, 1907–1909). They are informatively summarized in Kuchanov 1996.

Studies, Russian Academy of Sciences. However, they have not been clearly sorted and arranged: most of the Tibetan texts had originally been included in the fund of Chinese texts from Dunhuang and Tangut texts from Khara-khoto. Tibetan texts were found and taken out while sorting these funds of texts but it is not clear whether they are from Dunhuang or from Khara-khoto.<sup>12</sup> The following groups of Tibetan texts are considered to have been brought from Khara-khoto.<sup>13</sup>

1) The texts referred to under the code XT, which is the abbreviation for the Russian "Хара-хото, Тибетский" ("Khara-khoto, Tibetan"). This label given in 1967<sup>14</sup> led to the misunderstanding that all the texts with "XT" numbers came from Khara-khoto. In fact, although the majority are from Khara-khoto, several texts that apparently stem from Dunhuang were also included, for example: XT 2 and XT 31, Buddhist texts written in Old Tibetan;<sup>15</sup> XT 4, a contract (published in Takeuchi 1995 and *OTC*); XT 56, a *glegs-tshas* document;<sup>16</sup> XT 80, continuation of Pelliot tibétain 1128.<sup>17</sup> These Old Tibetan texts were most probably brought back from Dunhuang by the Oldenburg expedition.<sup>18</sup>

Originally there were 70 XT fragments (XT 1 – XT 70). Then, 16 texts were found while sorting the Tangut texts (XT 71 – XT 78). In addition, XT 87 and 88 are Tibetan and Tangut bilingual texts.<sup>19</sup> So far five XT texts were presented in *Lost Empire*, but the overall view has remained unknown.

2) About 10 folios of the *Prajñāparāmitā sūtra* taken out of the bindings of Tangut manuscripts. Until recently they had no inventory numbers.<sup>20</sup>

3) Another group of Tibetan fragments taken out of the bindings were presented to the Asiatic Museum by Kozlov himself in 1915. They are glued on 11 big folios of white paper and marked as "Supplement 2." "There are 15 fragments in cursive script (Koz. 1 – Koz. 5) and 16 fragments in formal *dbu-can* (Koz. 6 – Koz. 11)."<sup>21</sup>

**C) Collections in China:** After Kozlov and Stein, the Sino-Swedish Northwestern Scientific Expedition, headed by Sven Hedin and Xu Bingchang (徐炳昶), went to investigate the lower reaches of the Edzina River centered on Khara-khoto, where Huang Wenbi (黄文弼) excavated several hundred documents.<sup>22</sup>

After 1949, Edzina Banner or E ji na qi (額濟納旗), including Khara-khoto, was

<sup>12</sup> "Only a small part of [the] Tibetan fragments extracted from the bindings of Tangut manuscripts can be identified exactly as once belonging to the Big Mound hoard [in Khara-khoto]." Vorobyova-D. 1995: p. 46.

<sup>13</sup> Vorobyova-D. 1995: p. 47.

<sup>14</sup> The labels were given in a handwritten inventory by A. S. Martynov (cf. Vorobyova-D. 1995: p. 47).

<sup>15</sup> XT 11 – 15 may be from Dunhuang as well.

<sup>16</sup> Takeuchi 2013.

<sup>17</sup> According to the investigation by Kazushi Iwao.

<sup>18</sup> Takeuchi 1995: p. 52 fn. 5.

<sup>19</sup> Takeuchi 2004: p. 345.

<sup>20</sup> Vorobyova-D. 1995: p. 47.

<sup>21</sup> Vorobyova-D. 1995: p. 47.

<sup>22</sup> Preface by Shi jinbo (史金波) to *Russia K.K. Mss and China Miscell. Mss* (p. 2). These documents are now kept at the Chinese Academy of Social Sciences, Institute of Archaeology (中国社会科学院考古研究所), but we have no detailed information about them.

placed first under the administration of Gansu Province and then the Inner Mongolian Autonomous Region. The Inner Mongolian Cultural Relics Preservation Team made archaeological investigations twice in the Khara-khoto ruins in 1962 and 1963.<sup>23</sup> Then, the Gansu Province Cultural Relics Preservation Team made archaeological investigations in 1976 and 1979.<sup>24</sup>

More extensive expeditions were conducted in 1983 and 1984 by the Inner Mongolian Institute of Archaeological Studies and the Alashan Center of Cultural Relics Protection.<sup>25</sup> Through extensive excavations, over 3,000 documents were found. They are now kept in the Institute of Relics and Archaeological Studies or Nei menggu kaogu yanjiusuo (內蒙古自治區文物考古研究所) at Huhhot, in the Inner Mongolian Autonomous Region.

Among the finds acquired by these Chinese expeditions, 41 Tibetan texts were recently published in 2013 in *China Miscell. Mss*, together with texts in other languages (Uighur, Mongolian, Arabic, Persian, Syriac and Sanskrit).

Another collection is in the Inner Mongolia Etsina Archives or Nei menggu Ejina qi wenwu guanlisuo (內蒙古額濟納旗文物管理所) at Ejina, which houses 39 Tibetan texts. They are considered to be from the Khara-khoto area, but no data is available concerning their place of excavation. Judging from their appearance, they look relatively new and resemble the texts from Etsin-gol in the Stein Collection. Thus, they are more likely not to have been found in the Khara-khoto sites but were acquired near Khara-khoto and Etsin-gol (cf. §2). They remain unpublished.

Summarizing previous studies on the Tibetan texts from the Khara-khoto and Etsin-gol area kept in the major collections, half of those in Chinese collections were recently published, but the majority of the texts both in the Stein Collection and in the Kozlov Collection remain unpublished.

## 2. Provenance: Khara-khoto and Etsin-gol

### 2.1. Khara-khoto

Khara-khoto is located in Ejinaqi (額濟納旗) of Alashanmeng (阿拉善盟) in Inner Mongolia, to the northeast of Jiuquan city (酒泉市). Stein made excavations at six sites in and around the Khara-khoto town and numbered them from K.K. I. to K.K. VI. The site K.K. I. (= Khara-khoto site 1) refers to the ruined town of Khara-khoto. The sites K.K. II. to K.K. VI. are outside the town. Tibetan texts were found from K.K. I., K.K. II., K.K. III., and K.K. V. (See Plan 1 and Plan 2).

As regards K.K. I., there were many excavation points within the town. Major ruins are designated by adding Roman l.c. numbers from i. to ix. (K.K. I. i. – K.K. I. ix.).<sup>26</sup> A

---

<sup>23</sup> A small number of documents found by the expeditions are kept at the Museum of the Inner Mongolian Autonomous Region (內蒙古自治區博物館). Cf. *China Miscell. Mss*: p. 2.

<sup>24</sup> A small number of documents found by the expeditions are kept at the Museum of Gansu Province (甘肅省博物館). *China Miscell. Mss*: p. 2.

<sup>25</sup> See the excavation report in Neimenggu 1987.

<sup>26</sup> See Plan 2. However, there seems to be some confusion in the numbering system: e.g., K.K. i. and K.K. ii. coexist with K.K. I. i. and K.K. I. ii. within the town. The latter seems to refer to more clearly preserved buildings or *stūpas*.

few Tibetan texts were found at K.K. I. ii. and K.K. I. ix.<sup>27</sup> In addition, about twenty small fragments containing both Tibetan and Tangut writing were found within the town. They are collectively designated as 'K.K. 0121.'

K.K. II. is situated to the west of the town and close to the western river-bed. From K.K. II. a relatively small number of Tibetan texts were found, among which a well-known Tangut-Tibetan bilingual text fragment (K.K. II. 0234: Stein *IA*, Pl. CXXIV).<sup>28</sup> The K.K. II. site is identical with the Kozlov's famous "Suburgan" from where Kozlov acquired numerous valuable finds.<sup>29</sup>

K.K. III. is a collapsed *stūpa* situated less than a hundred yards (*circa* 91 m) from the northeastern corner of the town walls. Five Tibetan manuscripts were found here, one of them with a Tangut writing on it.<sup>30</sup>

K.K. V. is near the northwestern corner of the town, where there were two groups of *stūpas*, designated 'K.K. V. a.' and 'K.K. V. b.' The majority (253 out of 285) of the Tibetan manuscripts from Khara-khoto were taken from the latter site.<sup>31</sup>

**2.2. Etsin-gol:** The name "Etsin-gol" originally refers to the Etsin-gol river and the area along the river, the Etsin-gol delta. Stein, however, gave the name to another ruined site near Khara-khoto. The Etsin-gol site is a ruined town resembling Khara-khoto but smaller in size, located "about 25 miles NNW. of Khara-khoto,"<sup>32</sup> from where numerous leaves of Tibetan and Mongolian manuscripts and prints were excavated. Unfortunately, however, the Etsin-gol site was not visited and excavated by Stein himself, but was found and excavated by Stein's head camel-man Ḥasan Ākhūn. This is the reason why the finds from the Etsin-gol site lack the detailed site numbers designating the points from which texts and artifacts were excavated within the site (only E.G. + number: e.g., E.G.01).<sup>33</sup> There is also no sketch plan of the site. This situation makes the character of the E.G. Tibetan texts vague, insofar as it is unclear if they were actually excavated at the site or acquired somewhere nearby.

With respect to the Kozlov Collection, due to the excavators' lack of archaeological background, the finds were not located and described systematically.<sup>34</sup> The majority of the texts, especially the Tibetan manuscripts found together with Tangut manuscripts, obviously came from Khara-khoto.<sup>35</sup> However, several Tibetan manuscripts and block prints look considerably newer and similar to those from the Etsin-gol site in the Stein

---

<sup>27</sup> Cf. Stein *IA*, p. 444.

<sup>28</sup> Stein *IA*: p. 449: "The great rarity of Tibetan texts from K.K. II – only thirteen complete folia are recorded in the inventory – is also of interest, when compared with the large number of Tibetan materials from K.K. V."

<sup>29</sup> Stein *IA*: pp. 447–448.

<sup>30</sup> Stein states: "Tibetan writing was here rare [sic] and was found almost exclusively on the reverse of Hsi-hsia and Chinese papers." (Stein *IA*: p. 446).

<sup>31</sup> Stein *IA*: p. 446.

<sup>32</sup> Stein *IA*: p. 461.

<sup>33</sup> The texts and objects found from the Etsin-Gol site bear the site numbers E.G. 01.– E.G. 024. (cf. Stein *IA*: pp. 504–506 and 'A List of Tibetan Texts from Etsin-gol' in the present catalogue).

<sup>34</sup> Kychanov 1995: p. 40; Kychanov 1996.

<sup>35</sup> Most probably from the famous "Suburgan," which is identical with Stein's K.K. II.

Collection. According to Vorobyova-D. 1995 (p. 46), "[the] Kozlov [expedition] brought back not only fragments found in the Khara-khoto suburgan, but collected in the vicinity of these sites as well."

The collections in China kept at the Inner Mongolia Institute of Archaeology are no doubt from Khara-khoto, while the provenance of those kept at the Inner Mongolia Etsina Archives remains unclear.

### 3. Dates of the Texts

If we compare the texts excavated from the Khara-khoto sites and those acquired from Etsin-gol and environs, we notice distinct chronological differences. Namely, the former are clearly older than the latter: Those from the former site date to from the late 11<sup>th</sup> to 15<sup>th</sup> centuries, while those from the latter sites date to from the 16<sup>th</sup> to the early 20<sup>th</sup> centuries. In addition, the material from the former consists only of manuscripts, while the latter includes both manuscripts and prints. Tibetan texts from Khara-khoto were found together with Tangut texts, while the material from the latter sites includes Tibetan and Mongolian bilingual texts<sup>36</sup> but no Tangut texts.<sup>37</sup> These may be summarized as follows.

Khara-khoto: *circa* 11<sup>th</sup> c. – 15<sup>th</sup> c.

- a) relatively old
- b) only manuscripts
- c) with Tangut texts

Etsin-gol: *circa* 16<sup>th</sup> c. – 20<sup>th</sup> c.

- a) relatively new
- b) manuscripts and prints
- c) Tibetan–Mongolian

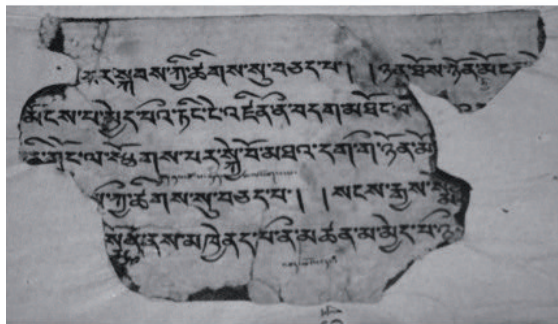

fig. 1

<sup>36</sup> For example, E.C.014.rr.

<sup>37</sup> Stein states: "the total absence of His-hsia texts among the written or printed remains from this source is certainly significant, and suggests that the deposit from which they were obtained is of considerably later date than the similar deposits found by us at Khara-khoto." (Stein *IA*: p. 462).

A closer look at the dates reveals that the earliest texts from Khara-khoto date to the late 11<sup>th</sup> to 12<sup>th</sup> centuries, so that they are either contemporary with or earlier than the Tangut period. They retain Old Tibetan palaeographic traits and resemble the 9<sup>th</sup>–10<sup>th</sup> century Buddhist texts from Dunhuang (fig. 1). A *Prajñāparamitā sūtra* in Tibetan translation written on large pothi, found in the Kozlov Collection, bears a Tangut text on the verso (fig. 2).<sup>38</sup> Apparently the Tangut side was written later, but the time interval cannot have been very long. In the Stein Collection several Tibetan texts with Old Tibetan palaeographic features were found together with a previously unnoticed Tangut text.<sup>39</sup> The most probable date for these Tibetan texts appears to be the late 11<sup>th</sup> to 12<sup>th</sup> centuries.

fig. 2

Among the texts from Khara-khoto, the Buddhist texts belonging to the Kadam (*bka' gdam*) school may date to the 13<sup>th</sup> to 15<sup>th</sup> centuries, as we will discuss in more detail below (§5.2). They are written in a cursive *dbu med* style (fig. 3) clearly distinct from the above-mentioned older texts.

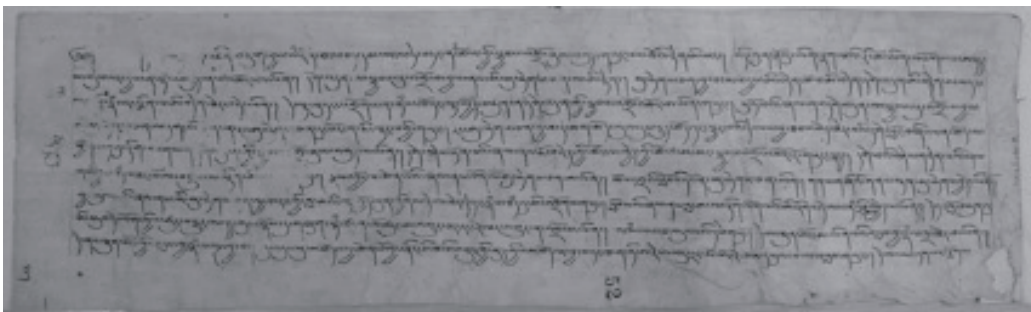

fig. 3

<sup>38</sup> Numbered XT 87. Originally two sheets of paper were glued together to form a two-layered sheet on both sides of which was written the *sūtra* in Tibetan translation. The two original sheets were later separated and the Tangut texts were written on their blank back sides. The Tangut text written in verse has not been identified. See Takeuchi 2004.

<sup>39</sup> The Tangut text is numbered 'K.K. II. 0303.a.' (Catalogue no. 22).

We also find another group of texts which may be dated to a time between the above two groups, namely the 12<sup>th</sup> to 13<sup>th</sup> centuries, according to their writing style, forms of the *shad*, and the like. As for the transitional processes of palaeography and writing style, we hope to discuss this in more detail in a separate paper.

Thus, we might provisionally propose three time periods for the Tibetan texts from Khara-khoto: 1) early period: late 11<sup>th</sup> to 12<sup>th</sup> centuries. 2) middle period: late 12<sup>th</sup> to 13<sup>th</sup> centuries. 3) late period: late 13<sup>th</sup> to 15<sup>th</sup> centuries. The shift from Old Tibetan to Classical Tibetan occurred in the middle period, while the establishment of the Classical Tibetan style occurred in the late period.

As regards the Tibetan texts from Etsin-gol, no texts written in Old Tibetan style were found. All are written in more recent styles; some are in running hand (*skyug-yig*); some are Tibetan and Mongolian bilingual texts (fig. 4).<sup>40</sup> They all seem to date to after the 16<sup>th</sup> century. Among them, the following texts are dated to as late as the 19<sup>th</sup> to early 20<sup>th</sup> centuries:

- a) *rje btsun sgrol ma'i gsang mchod* (E.G.023.ff: fig. 5) by Blo bzang tshul khrim rgya mtsho (1845–1915)<sup>41</sup>
- b) *sgrol ma manda la bzhi pa'i cho ga bya tshul* (E.G.023.v) by Ngag dbang mkhen rab bstan pa'i dbang phyug (19<sup>th</sup> c.)

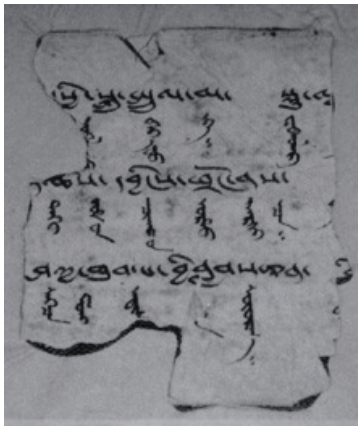

fig. 4

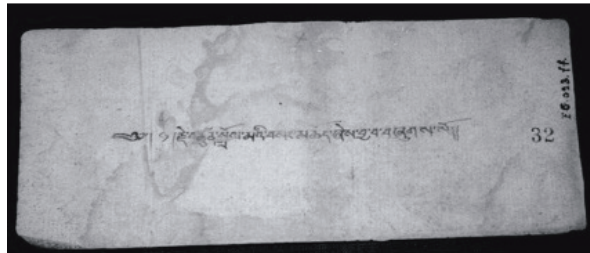

fig. 5

It is surprising to find such modern texts. Especially, the former is nearly contemporary to the time of the Kozlov and Stein expeditions. Thus, it is not likely that they were excavated from the old ruins but were possibly still in use among local Mongolian Tibetan Buddhists and were acquired from them.

<sup>40</sup> E.G. 013.a.xvi., E.G. 014.rr. Poppe (1959) also contains several Mongol and Tibetan-Mongol fragments (E.G. 021.g. and 021. i.).

<sup>41</sup> The person might be Gser thog no min han, who was the 63rd Sku 'bum khri chen.

#### 4. Varieties of Texts

As we mentioned in the Introduction, the Tibetan texts from Khara-khoto and Etsin-gol are extremely variegated in variety in terms of dates, forms, writing style and contents. There are about 700 manuscripts and 400 printed texts. The majority of the printed texts are xylographs, but there is a stamp and a print from wooden movable type.<sup>42</sup> Their forms also vary, including single leaf, pothi, scroll, concertina and codex.

As for the writing style, some are written in an Old Tibetan style similar to the 9<sup>th</sup> to 10<sup>th</sup> centuries texts (figs. 1 and 2). Some are written in a later cursive *dbu med* style (fig. 3), and some are in running hand or *skyug yig* style (fig. 6).<sup>43</sup> These varieties provide evidence for stages of the development of Tibetan writing styles.

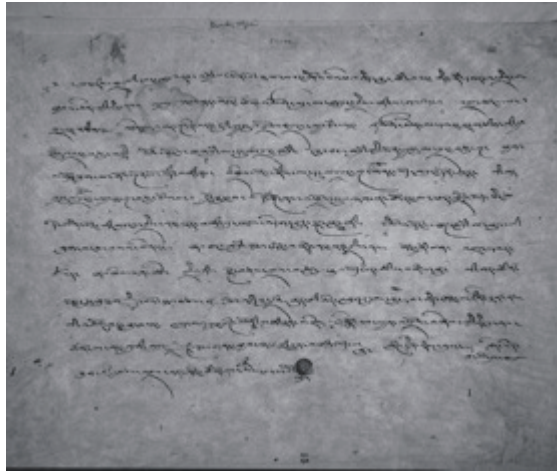

fig. 6

Regarding their contents, Buddhist texts are by far the most numerous, but there are other kinds of texts, including divinational, calendrical, and medical texts, and Tibetan-Tangut and Tibetan-Mongolian bilingual texts of varying content. In the next section we will look at some characteristics of Buddhist texts.

#### 5. Buddhist Texts: Tantric texts and the Kadam School (*bka' gdams pa*) Texts

Various kinds of Buddhist texts were found in Khara-khoto and Etsin-gol, including *sūtras*,<sup>44</sup> commentaries,<sup>45</sup> Tantric texts<sup>46</sup> and others.<sup>47</sup> Of these, we wish to take up two groups of texts: namely, Tantric texts and the Kadam school texts, which represent two trends of Tibetan Buddhism in the Tangut state and the Gansu area.

<sup>42</sup> Shi 2005.

<sup>43</sup> For example, a letter: E.G. 018.a.

<sup>46</sup> E.g., *Laghuśaṃvara* (P.16/ D.368) (Catalogue nos. 68, 69, 70, 78?).

<sup>47</sup> For all the identified Buddhist texts, see 'Classification of Khara-khoto texts.'

### 5.1. Tantric Buddhist Texts:

It has been argued by Nishida and Kychanov from examination of Tangut texts that Tangut Buddhism was heavily influenced by Tibetan Buddhism.<sup>48</sup> Several Tangut Buddhist texts are regarded as having been translated from Tibetan.<sup>49</sup> Shen Weirong, having examined the Khara-khoto Chinese texts, has shown that many Chinese Buddhist texts are translations of Tibetan tantric texts as well. Shen has further compared these Chinese texts with the Uighur Buddhist texts from Turfan and the Tangut texts from Khara-khoto and Ningxia. He concludes that the Chinese, Uighur, and Tangut Buddhist texts all go back to the same origin, namely Tibetan Tantric texts.<sup>50</sup>

Many of the Tantric texts are continuations from the 10<sup>th</sup> century texts found in Dunhuang, that is, before the *phyi dar* or 'second diffusion.' But there also exist Tantric texts which belong to the Kagyu (*bka' brgyud*) school. In both cases they were translated into Chinese, Tangut and Uighur. In this sense, the Tibetan Tantric texts from Khara-khoto need to be sorted out and further identified in comparison with the 10<sup>th</sup> c. Dunhuang texts and the texts in other languages.

### 5.2. The Kadam (*bka' gdams*) School Texts:

Two texts have been identified as belonging to the Tibetan Buddhist Kadam school. Both were found from the site K.K. V. b.

One, numbered K.K. V. b. 035.b. (Catalogue no. 267), has been identified by Kazuo Kano as the topical outline or synopsis of the *rgyud bla ma'i bsdus don* written by the well-known translator Rngog blo ldan shes rab (1059–1109).<sup>51</sup>

The other consists of five pothi leaf fragments,<sup>52</sup> which are likely to belong to one text. Since both the cover page and colophon are lacking, the title of the text and the author remain unidentified. However, as Iuchi (2011) has pointed out, the names of Kadampa masters—such as Dge bshes ston pa ('brom ston pa rgyal ba'i 'byung gnas, 1005–1064), Pu to ba (po to ba rin chen gsal, 1027–1105), Bya yul ba (bya yul ba gzhon nu 'od, 1075–1138) and Sne'u zur ba (sne'u zur pa ye shes 'bar, 1042–1118)—appear frequently in this text, where the words of these Kadampa masters are quoted as follows.

*bya yul ba'i zhal nas mi mu stegs can bya ba rang gyi bla ma'i lta spyod sun byin pa de la zer de dang rnam pa thams cad du mi 'grogs gsung /* (K.K. V. b. 021.c.: ka, 49a7–8) "Bya yul ba says: A heretic is a person who criticizes the views and practices of his own Lama. Hence, it is not advisable to be on good terms with such a person."

<sup>48</sup> Nishida 1975 and Kychanov 1978.

<sup>49</sup> For the Tangut Buddhist texts translated from Tibetan, see Nishida 1975: pp. 8–14; 1997: pp. 455–468. In the Catalogue, we provide Kychanov catalogue number (Kychanov *Cat.*) and/or Nishida 1977 number to corresponding Tibetan texts.

<sup>50</sup> Shen 2010.

<sup>51</sup> Kano 2008: pp. 134–36. The text has a colophon, which reads: *rgyud bla ma'i bsdus don lo tsa ba dge slong blo ldan shes rab kyis sbyar pa //* "Topical outline of the Uttarantra composed by the monk Blo ldan shes rab, the translator".

<sup>52</sup> They were all found from the same site, K.K. V. b. They are numbered: K.K. V. b. 09. f., K.K. V. b. 09. n., K.K. V. b. 011. c., K.K. V. b. 021. c., and K.K. V. b. 034. b. (Catalogue nos. 74, 82?, 100, 210, 260).

*bya yul ba'i zhal nas zla gzas 'dzin pa'i dus su dus gzhan las khri 'gyur gyis bsod nams che ba yin* / (K.K. V. b. 021.c.: ka, 49b8–9) "Bya yul ba says: The merits [acquired] during the lunar eclipse are ten thousand times greater than at other times."

*dge bshes ston pa'i zhal nas skyabs 'gro shor na sdom pa gzhan rnams mi 'chor sbang ro bzhin du nus med du 'gro ba yin skyabs 'gro sor chud na sdom pa gzhan rnams kyang sor chud pa yin* / (K.K. V. b. 011.c.: ka, 3a1–2) "Dge bshes ston pa ('brom ston pa) says: if [one] loses the vow of taking refuge [in Buddha and *saṅgha*], other *viñaya* vows are not lost but become ineffective just like a drained malt (?). If the vow of taking refuge is recovered, other *viñaya* vows are also recovered."

The quotations of these Kadampa pa masters, who belong to the early phase of the *phyi dar* and the foundation of the Kadam school in the middle of the 11<sup>th</sup> century, clearly indicate that the text belongs to the Kadam Buddhist School. The content of the text is similar to the so-called *bka' gdams gsung thor bu*, a collection of quotations from the Kadampa masters, which started to be compiled from the 12<sup>th</sup>–13<sup>th</sup> centuries onward.<sup>53</sup>

Kazuo Kano recently identified one of the K.K. texts (Catalogue no. 153) as Atiśa's work.<sup>54</sup> Presence of the Atiśa's works both in Tibetan and Tangut reinforces the intensive relationship between the Kadam school and Tangut Buddhism.<sup>55</sup>

## 6. Texts to be compared

In order to further understand the nature of the Khara-khoto and Etsin-gol Tibetan texts, we should compare them with other groups of texts which may possibly belong to the same or similar period of time. The importance of the Tibetan texts from the Tabo Monastery in Western Tibet has been well recognized.<sup>56</sup> These texts, written in Old Tibetan writing style, resemble the early period Khara-khoto texts.

Also no less important are the texts found from the Northern Grottoes of Magaoku (Mogao Cave) in Dunhuang, where a considerable number of Tibetan Buddhist manuscripts were found together with Chinese, Tangut, Uighur, Mongol, Sanskrit, and Syrian ones. Many of them are considered to date to the Tangut and Mongol periods, namely the 13<sup>th</sup> to 15<sup>th</sup> centuries. In this sense, they may be contemporary with the middle and late periods of Tibetan texts from Khara-khoto.<sup>57</sup>

<sup>53</sup> Regarding the relationship between Rwa sgreng monastery, the mother monastery of the Kadam school and the Xixia court, see Iuchi 2012. Kirill Solonin of Renmin University (Beijing, PRC) discusses a Tangut version of a work by Atiśa's from Khara-khoto in his forthcoming article, "Dīpaṃkara in Tangut Context: An Inquiry into Systematic Nature of Tibetan Buddhism in Xixia."

<sup>54</sup> *Bodhimārgapradīpapañjikā* (*Byang chub lam gyi sgron ma'i dka' 'grel*) (P.5344 / D.3948). (Personal communication). There is a Tangut translation of this text, see Nishida 1977: no. 292 (p.56).

<sup>55</sup> Solonin's recent article (Solonin 2015) summarizes strong influence of Tibetan Buddhism to Tangut Buddhism.

<sup>56</sup> For the Tabo texts, see *East and West* 44–1 (1994, Rome: IsMEO), Scherrer-Schaub & Steinkellner 1999, and Petech & Luczanits 1999.

<sup>57</sup> There are several other groups of texts which may be compared with them:

– The *Phu ri 'i yig tshangs* from Gnya' lam rdzong

Among the 139 Tibetan texts in the German Turfan Collection published by Taube, the majority belong to the Tibetan imperial period, but 14 texts definitely belong to the post-imperial period or even later,<sup>58</sup> and further 12 may also belong to the same periods.<sup>59</sup> They are most likely to have been produced by Uighur Buddhists in Turfan, as we will discuss in §7.

The Tibetan texts from Etsin-gol, which date to the 16<sup>th</sup> to 20<sup>th</sup> centuries, written mainly by Mongol Buddhists, may be better compared with the Tibetan texts brought from Mongolia to Russia and Hungary and now preserved in St. Petersburg Academy of Science and Hungarian Academy of Science respectively.<sup>60</sup> They reflect the activities of Mongolian Buddhists.

## 7. Historical Background of the Tibetan Texts from Khara-khoto and Etsin-gol

In what historical, social and sociolinguistic backgrounds were these Tibetan texts produced in or brought into Khara-khoto and Etsin-gol after the 12<sup>th</sup> century, where there was almost no Tibetan population? Let us look at the preceding periods.

The Tibetan Empire occupied vast areas of Central Asia, including the Gansu Corridor, till the mid-9<sup>th</sup> century. In that time, the Tibetan language prevailed among the various ethnic groups under Tibetan rule.<sup>61</sup> It has been recently recognized that Tibetan continued to be used by non-Tibetan peoples in Central Asia as an international *lingua franca* even after the end of the Tibetan domination.<sup>62</sup>

Recent researches further revealed that Tibetan Buddhism also continued to be revered by local inhabitants, and that an increasing number of Tibetan Buddhist texts, especially Tantric texts, were produced in the 10<sup>th</sup> century, as attested by numerous newly identified Tibetan texts from the Dunhuang cave.<sup>63</sup> Chinese, Khotanese and Uighurs copied Tibetan Buddhist texts and donated them to temples in Dunhuang.<sup>64</sup>

Tibetan Buddhism continued to flourish among local peoples in Central Asia in the 11<sup>th</sup> to 13<sup>th</sup> centuries. The activities of Uighur Buddhists were particularly conspicuous. Uighur monk pilgrims visited the Dunhuang and Yulin caves and left graffiti of their names on the cave walls.<sup>65</sup> These Uighur pilgrims were from Turfan and Hami. The

- 
- The *Bon gyi gna' dpe* from Dga' thang
  - The texts preserved in Liangzhou Prefecture
  - The *Bla 'bum* at Gro mkhar dgon in Gnyal yul

<sup>58</sup> Taube 1980: Texts 26, 49, 50, 52-56, 69, 102, 107, 109, 120 and 127.

<sup>59</sup> Taube 1980: Texts 19, 25, 36, 47, 48, 51, 71, 103, 104, 111, 115 and 117.

<sup>60</sup> Takeuchi had the opportunity to examine these texts when he visited the institutes, but we have no information about whether or not they have been published.

<sup>61</sup> Takeuchi *OTC*: p. 133.

<sup>62</sup> Takeuchi 2004, 2012.

<sup>63</sup> Takeuchi 2012.

<sup>64</sup> For example, Tibetan Buddhist texts with page numbers in Khotanese (e.g., IOL Tib J 423) were apparently copied and donated by Khotanese pilgrims (Takeuchi 2012).

<sup>65</sup> They wrote their names in Tibetan: *se chu stong brtsan* 'Stong brtsan from Turfan', *^yi cu chos sprin* 'Chos sprin from Hami', *^yi cu pa btsun pa sar pa* 'novice Btsun pa from Hami.' The last one also wrote his name in Uighur script: *yangi tsunpa*. See Iwao 2012. They also wrote their Tibetan Buddhist names in Uighur script: *čospal* < Tib. *chos dpal*, *torčipal* < Tib. *rdo rje dpal*. See Matsui 2008a, 2008b.

aforementioned (cf. §6) post-imperial period Tibetan texts in the German Collections from Turfan are most likely to have been produced by these Uighur Buddhists in the Turfan area.

The presence of Uighur Tibetan monks in Khara-khoto is attested by Uighur texts from Khara-khoto.<sup>66</sup> There was a wide range of activities by Uighur Buddhists connecting Turfan, Hami, Dunhuang and Khara-khoto. They must have been instrumental in bringing Tibetan Buddhism into the Tangut state.

In this way, after the collapse of the Tibetan Empire Tibetan Buddhism continued to flourish in Central Asia from the 10<sup>th</sup> to 14<sup>th</sup> centuries, namely the Tangut and Mongol periods. Tibetan Buddhism played a key role in the Tangut state and continued to do so in the Mongol period.<sup>67</sup> Numerous Tibetan Tantric texts from Khara-khoto were most probably produced in this context.

This Central Asiatic view of Tibetan Buddhism is in sharp contrast to the traditional Tibetan view that the age after the collapse of the empire, i.e. the late 9<sup>th</sup> to early 11<sup>th</sup> c., is seen as dark and fragmented, with no prominent Buddhist activities until the so-called 'later diffusion' or *phyi dar*, after which new Buddhist schools, such as the Kagyu and Kadam, emerged. Interestingly, Tibetan texts which belong to the Kagyupa and Kadampa traditions were also found in Khara-khoto.<sup>68</sup>

Thus, the Tibetan Buddhist texts from Khara-khoto, in other words, Tibetan Buddhism in the Tangut state, seem to have two trends or origins: one is a continuation of Tibetan Tantric Buddhism that flourished in Central Asia and was maintained largely by non-Tibetans, and the other is the newly emerged Buddhist traditions, Kagyupa and Kadampa, supported mainly by Tibetans. Both trends flowed into the Tangut state and became sources for Tangut, Chinese and Uighur translations.

After the town of Khara-khoto was completely abandoned, Tibetan Buddhism still continued to be venerated, mainly by local Mongols; they also produced calendars, and medical and divinational texts in Tibetan, as attested by various Tibetan texts from Etsin-gol.

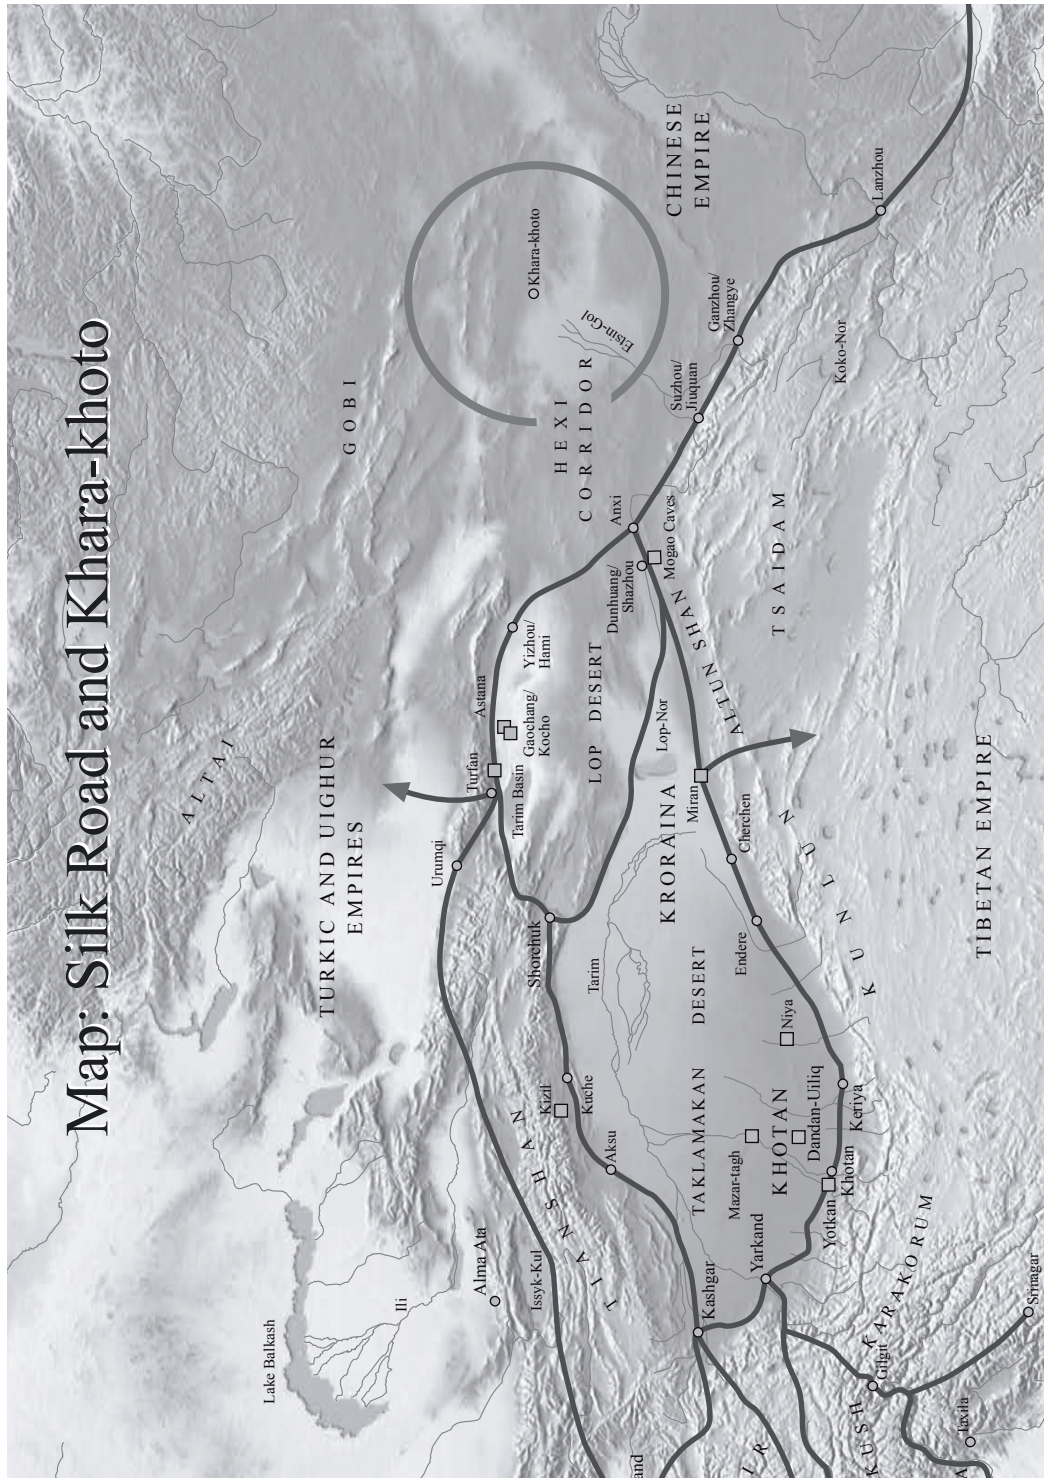

Thus, the Tibetan texts from Khara-khoto and Etsin-gol are valuable evidence for the continuous presence of Tibetan Buddhism and the Tibetan literary tradition in Central Asia (Gansu to Mongolia) for over ten centuries (11<sup>th</sup> to 20<sup>th</sup> c.).

---

<sup>66</sup> Matsui 2008a: p. 39.

<sup>67</sup> On the world-historical role of the continued influence of the Tibetan Empire after its fall, via Tibetan Buddhism, see Beckwith 1987.

<sup>68</sup> E.g., Catalogue no. 102, 232, 270, 274. As a Kagyupa text, K.K. V. b. 011. e. (Catalogue no. 102) mentions Mar pa and Naropa. Both Chinese texts and Tangut texts concerning *The Six Doctrines of Nāropa* (*Nā ro chos drug*) also attest the presence of Kagyupa teachings in the Tangut state (Shen 2010: p.348; Nishida 1999: p. XL). For Kadampa texts, see § 5.2.

1, 2 For example:

ms	manuscript
printed	printed
frag	fragmentary text
complete	text written on a complete single sheet of paper

3 For example:

r 2+1, v 1	two lines and one interlinear line on recto and one line on verso interlinear lines are not included in transliteration
v 9+1 (Tangut)	nine lines in Tibetan and one line in Tangut on verso

4 The Roman transliteration of Tibetan follows the Wylie System proposed in Wylie (1959), with the following modifications.

I	reversed <i>gi-gu</i>
T	reversed <i>t</i>
a', i', u', e', o'	long vowels (ā, ī, ū, ē, ō) expressed by subfixed <i>a-chung</i>
^a	ཨ
s+ho	ཨོ
\$	a sentence and page initial sign ༄
:	<i>tsheg</i> written with two dots

## Signes Critiques

[abc]	supplements; letters illegible or disappeared, but supplied by the editors
[abc?]	doubtful readings
[. . .]	illegible letters; number unknown
[---]	illegible letters; number known, indicated by broken lines
(abc)	editors' note

1	K.K.0121.ff 16 pieces ms Buddhist text, Unidentified	Vol.12 fol.1 frag	Tibetan	IOL Tib M 1002 dbu can Tangut
Sixteen small pieces. Ten contain Tibetan (ms, dbu can); four contain Tangut; two are blank.				
2	K.K.0121.gg 7.6x15.5 ms Buddhist text, Unidentified	Vol.03 fol.54 frag pothi	Tibetan	IOL Tib M 200 dbu can
Six small fragmentary pieces, each bearing one or two lines. Words, such as <i>nam mkha[']</i> , <i>kun las rgyal</i> , <i>bcom [ldan 'das?]</i> , are legible.				
3	K.K.I.ii.03 17.0x12.5 Unidentified	Vol.05 fol.22 frag single sheet	r blank, v blank	IOL Tib M 343
Paper cut into the shape of a flower on top of trapezium.				
4	K.K.I.ix.017.t.i 12.3x11.5 ms (r) Buddhist text, Tantric, (v) Buddhist text, <i>Hua yan jing</i> 華嚴經	Vol.05 fol.23 frag single sheet	r 10, v 6(Chin.) Tibetan	IOL Tib M 344 dbu can Chinese
Middle part of a pothi leaf. Chinese on verso is probably from the <i>Hua yan jing</i> 華嚴經 ( <i>Taisho</i> , vol.10: No.279, 211b15–17).

## List of Tibetan Texts from Etsin-gol

site number	requisition number ms / printed description of the text	size writing style	physical condition classification	number of lines	format language
E.G.010.i	IOL Tib M 835 ms	3.5x8.4 (fol.40) dbu med	frag Calendar		single sheet
E.G.0115.a.xx	IOL Tib M 402 printed Marginal number: 三本, 三十七	8.3x8.8	frag Buddhist text	r 6, v 6	pothi
E.G.013.a	IOL Tib M 1 ms Marginal number: <i>drug</i>	8.7x28.0 dbu can	frag Buddhist text	r 8, v 8	pothi
E.G.013.a.i	IOL Tib M 217 ms Marginal number: <i>l2</i>	6.0x12.6 dbu can	nearly complete Buddhist text, Prayer?	r 4, v blank	pothi
E.G.013.a.ii	IOL Tib M 148 ms Marginal number: <i>gn̄yis</i>	9.1x6.1 dbu can	frag Buddhist text, Tantric	r 7, v 7	pothi
E.G.013.a.iii	IOL Tib M 149 ms	7.7x8.9 dbu can	frag Buddhist text	r 6, v 6	pothi
E.G.013.a.iv	IOL Tib M 150 ms The beginning and end are in Tibetan. The main part is possibly Tibetan transliteration of Mongolian. A stamp like square format.	10.2x7.5 dbu can	frag Amulet?	r 10, v 8	single sheet Mongolian?
E.G.013.a.ix	IOL Tib M 62 ms	10.5x8.1 dbu can	frag Buddhist text	r 6, v blank	pothi
E.G.013.a.v	IOL Tib M 218 ms Marginal number: <i>bcu</i>	6.8x8.0 dbu can	frag Buddhist text	r 5, r 5	pothi
E.G.013.a.vi	IOL Tib M 219 printed Marginal number: 九, 独. Printed text in red. Same text as IOL Tib M 220.	1.8x14.4/ 5.8x14.2	frag Buddhist text, Ritual	r 5, v blank	pothi

Tibetan Texts from Khara-khoto in The Stein Collection of the British Library

E.G.013.a.vii	IOL Tib M 151 ms Two pieces.	7.5x7.2/ 7.3x7.2 dbu can	frag Buddhist text	r 6/ r 5, v blank	pothi
E.G.013.a.viii	IOL Tib M 61 ms	7.0x10.3 dbu can	frag Buddhist text	r 5, v blank	pothi
E.G.013.a.xi	IOL Tib M 152 ms	8.5x8.5 dbu can	frag Buddhist text	r 6, v blank	pothi
E.G.013.a.xii	IOL Tib M 221 ms	7.3x20.8 dbu can	frag Table of Tibetan alphabets	r 3, v blank	pothi
E.G.013.a.xiii	IOL Tib M 63 ms Title: <i>rab yid nang tshan khro bo zhes pa shing mo glang lo'i le'u tho [...] me long zhu so //</i>	8.6x21.4 dbu can	frag Calendar	r 1+1, v 2+4	pothi
E.G.013.a.xiv	IOL Tib M 64 ms	12.9x17.0 dbu can	frag Buddhist text, Tantric	r 6, v blank	pothi
E.G.013.a.xix	IOL Tib M 301 ms	19.3x9.5 dbu can	frag Buddhist text	r 8, v 9	pothi
E.G.013.a.xliii	IOL Tib M 224 ms Written 'E.G.a.xliii' on the document.	3.8x11.2 dbu med	frag Letter?	r 1, v 2	pothi
E.G.013.a.xv	IOL Tib M 285 ms A list of years in the cycle according to the Hor	13.6x19.0 dbu med	nearly complete Calendar ( <i>hor zla</i> ) calendar system ( <i>hor zla</i> ).	r 12, v blank	single sheet
E.G.013.a.xvi	IOL Tib M 65 ms A list of birds with Mongolian glosses.	8.8x17.2 dbu can	frag List	r 3+2, v blank	pothi Mongolian
E.G.013.a.xviii	IOL Tib M 66 ms	8.6x24.1 dbu can	frag Calendar	r 10, v 9	pothi

E.G.013.a.xx	IOL Tib M 67 ms	11.1x17.7 dbu can	frag Buddhist text, Sūtra	r 1, v 9	pothi
Marginal number: <i>gcig. shes rab kyi pha rol tu phyin pa rdo tje gi gcod pa //</i> (P.739/ D.16)					
E.G.013.a.xxii	IOL Tib M 68 ms	10.8x21.3 dbu med	frag Buddhist text, Tantric ritual	r 9, v blank	single sheet
E.G.013.a.xxiii	IOL Tib M 289 printed	26.0x25.0	frag Buddhist text	r 26, v blank	single sheet
Repetitions of a formula.					
E.G.013.a.xxiiii	IOL Tib M 69 ms	10.0x24.0 dbu med	frag List	r 7, v blank	single sheet
Name list with numerical signs enclosed in circle.					
E.G.013.a.xxv	IOL Tib M 223 ms	6.5x15.5 dbu can	complete Table of Tibetan alphabets	r 2, v blank	pothi
E.G.013.a.xxvi	IOL Tib M 71 ms	6.7x12.8 dbu can	frag Buddhist text		pothi
Four small oblong pieces.					
E.G.013.a.xxvii	IOL Tib M 70 ms	9.9x17.8 dbu can	frag Buddhist text, Tantric	r 3, v blank	pothi
Marginal number: <i>bcu gcig</i> . Ending part of probably Tantric text.					
E.G.013.a.xxviii	IOL Tib M 153 printed	7.4x17.0	frag	r 6, v blank	pothi
Marginal number: 八					
E.G.013.a.xxix	IOL Tib M 287 ms	18.0x17.7 dbu med/ dbu can	frag Buddhist text	r 3, v blank	pothi
E.G.013.a.xxx	IOL Tib M 222 ms	5.3x17.2 dbu med	complete Calendar	r 6, v blank	single sheet
List of numbers. Appears <i>chad</i> .					
E.G.013.a.xxxi	IOL Tib M 288 printed	dbu can	frag Buddhist text		single sheet
Six small pieces.					

Tibetan Texts from Khara-khoto in The Stein Collection of the British Library

E.G.013.aa	IOL Tib M 740 ms	8.3x30.5 dbu med	nearly complete Buddhist text	r 7, v 7	pothi
Marginal number: <i>dgu</i> . v(2) mentions <i>bod 'dir chos tshig gi bang du byas pa'i yul dbus yin</i> .					
E.G.013.b	IOL Tib M 2 ms	8.8x33.0 dbu can	nearly complete Buddhist text, Tantric	r 6, v 6	pothi
Marginal number: <i>bzhi</i>					
E.G.013.bb	IOL Tib M 80 ms	8.7x21.7 dbu can	complete Buddhist text, Ritual	r 7, v blank	pothi
Invocation of a <i>yi dam</i> .					
E.G.013.bb	IOL Tib M 931 ms	8.7x19.3 dbu can	complete Buddhist text, Tantric	r 7, v 7	pothi
Marginal number: <i>bco bgyad</i> . IOL Tib M 931–933 are pothi leaves from the same text.					
E.G.013.c	IOL Tib M 225 ms	8.4x26.1 dbu can	complete Buddhist text	r 6, v 6	pothi
A prayer to <i>sgra dbayngs rgyal po</i> .					
E.G.013.cc	IOL Tib M 714 ms	7.6x22.6 dbu med	frag Buddhist text	r 7, v 7	pothi
Marginal number: <i>brgyad</i> . Title: <i>arya mi tri pra NI [ / 'phags pa byam [ (P.5925/ D.4378?)</i>					
E.G.013.cc	IOL Tib M 1001 printed	7.5x11.7	frag Buddhist text	r 5, v 5	pothi
Marginal number: <i>bzhi?</i>					
E.G.013.d	IOL Tib M 3 ms	9.0x45.2 dbu med	frag Medical text	r 8, v 8	pothi
From the same text as IOL Tib M 16, 165, 254, and 862.					
E.G.013.dd	IOL Tib M 981 ms	8.5x21.5 dbu med	complete Buddhist text, Tantric	r 6, v 6	pothi
Marginal number: <i>bzhi</i>					
E.G.013.e	IOL Tib M 4 ms	9.5x26.5 dbu can	frag Buddhist text, Tantric	r 7, v 5	pothi
E.G.013.ee	IOL Tib M 708 ms	6.8x25.5 dbu can	complete Buddhist text, Tantric	r 4, v 4	pothi

E.G.013.f	IOL Tib M 5 ms	8.2x25.6 dbu can	complete Buddhist text	r 7, v 6	pothi
E.G.013.ff	IOL Tib M 935 ms Marginal number: <i>bdrug</i>	6.0x21.2 dbu can	complete Buddhist text	r 5, v 5	pothi

5 recto

6 recto

6 verso

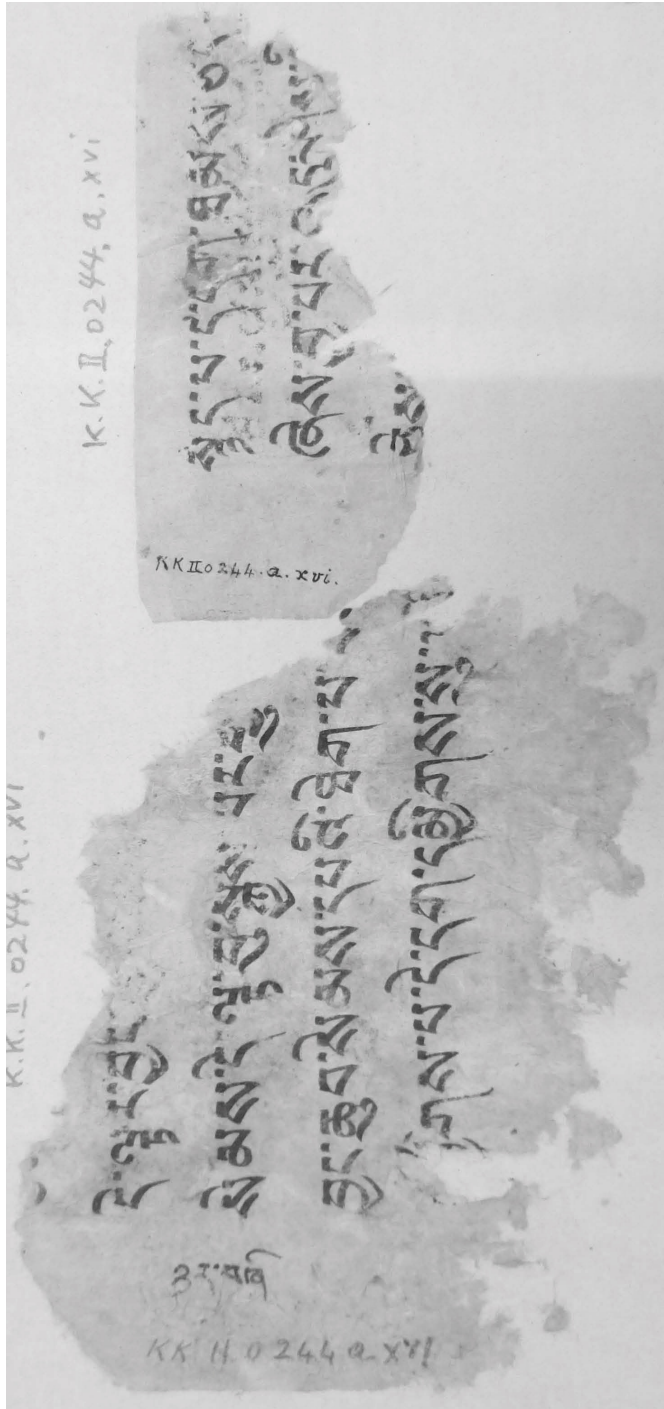

7 recto

7 verso

Handwritten text in Tibetan script on a fragment of aged paper. The text is arranged in approximately 12 horizontal lines. The script is a traditional form of Tibetan calligraphy. The paper is heavily damaged, with significant portions missing, particularly in the middle section. A small, faint stamp or mark is visible near the top center of the fragment. The overall appearance is that of an ancient manuscript page.

46 recto

46 verso

47 recto

47 verso

Handwritten text in an early Cyrillic script, likely Church Slavonic, on a fragment of parchment. The text is arranged in approximately 15 lines. A small number '58' is written in the center of the page. A vertical scale bar labeled 'cm' is visible on the right side of the fragment.

48 recto

Handwritten text in an early Cyrillic script, likely Church Slavonic, on a fragment of parchment. The text is arranged in approximately 15 lines. A small number '59' is written in the center of the page. A vertical scale bar labeled 'cm' is visible on the right side of the fragment.

48 verso

50 recto

Handwritten text in a medieval script, likely a form of Gothic or similar, on a parchment fragment. The text is arranged in approximately 15 lines. A small number '60' is written in the center of the page. The parchment shows signs of age and wear, with some staining and irregular edges.

50 recto

50 verso

Handwritten text in a medieval script, likely a form of Gothic or similar, on a parchment fragment. The text is arranged in approximately 15 lines. The parchment shows signs of age and wear, with some staining and irregular edges.

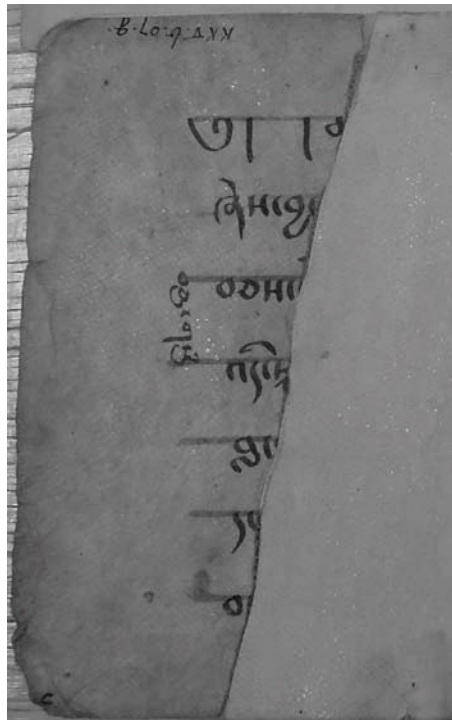

50 verso

Handwritten text in a medieval script, likely Latin, on a fragment of parchment. The text is arranged in a single column and is partially obscured by a large tear at the top. A small number '2' is visible near the center of the page.

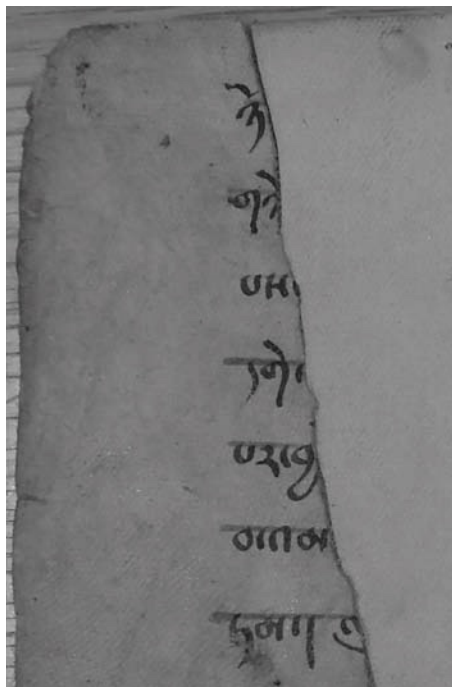

51 recto

Handwritten text in a medieval script, likely Latin, on a fragment of parchment. The text is arranged in a single column and is partially obscured by a large tear at the top. A small number '2' is visible near the center of the page.

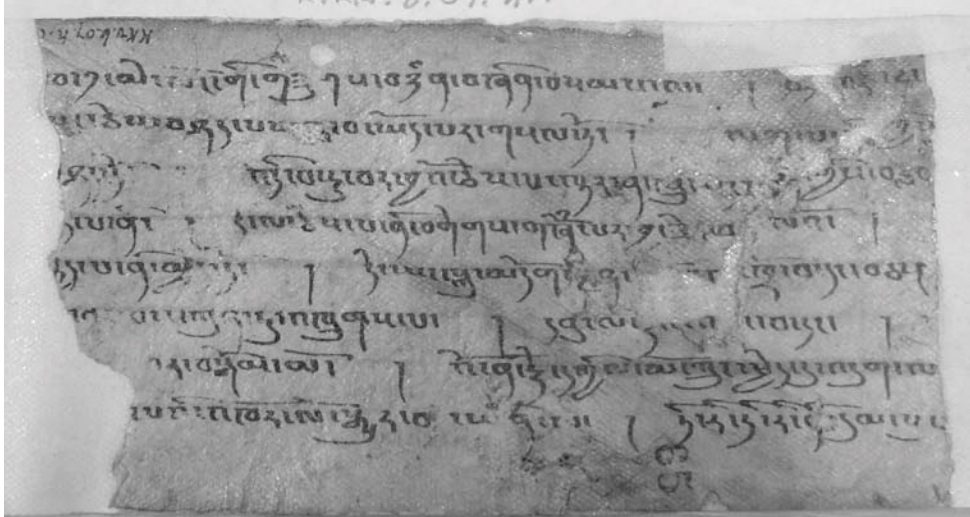

51 verso

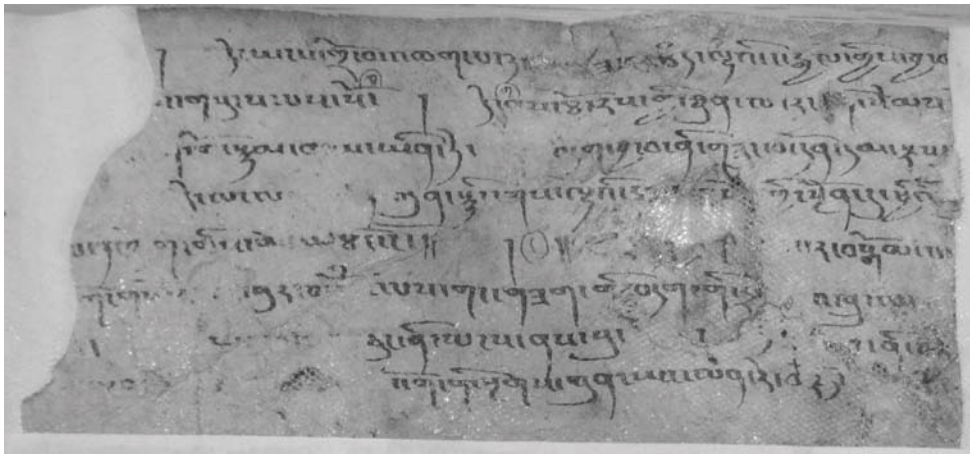

52 recto

52 verso

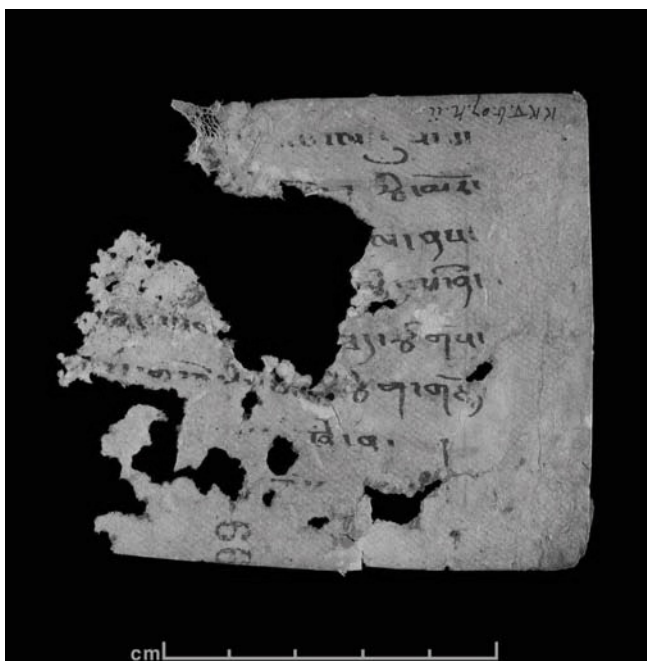

53 recto

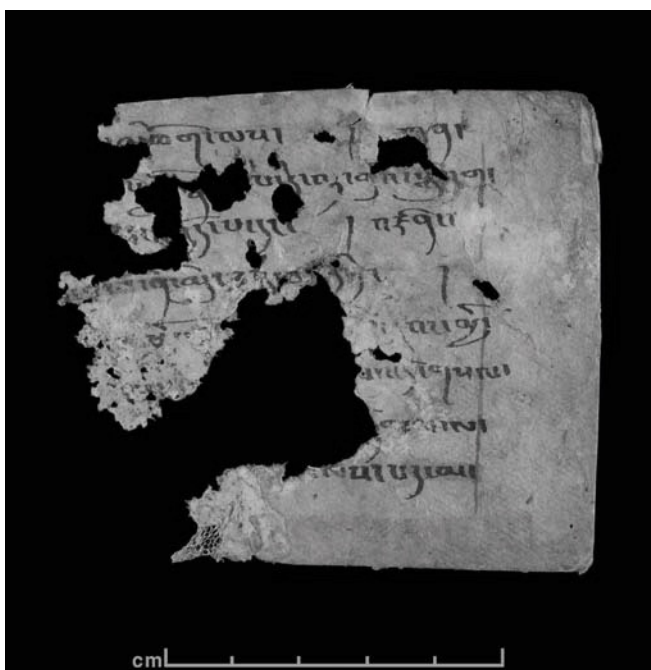

53 verso

54 recto

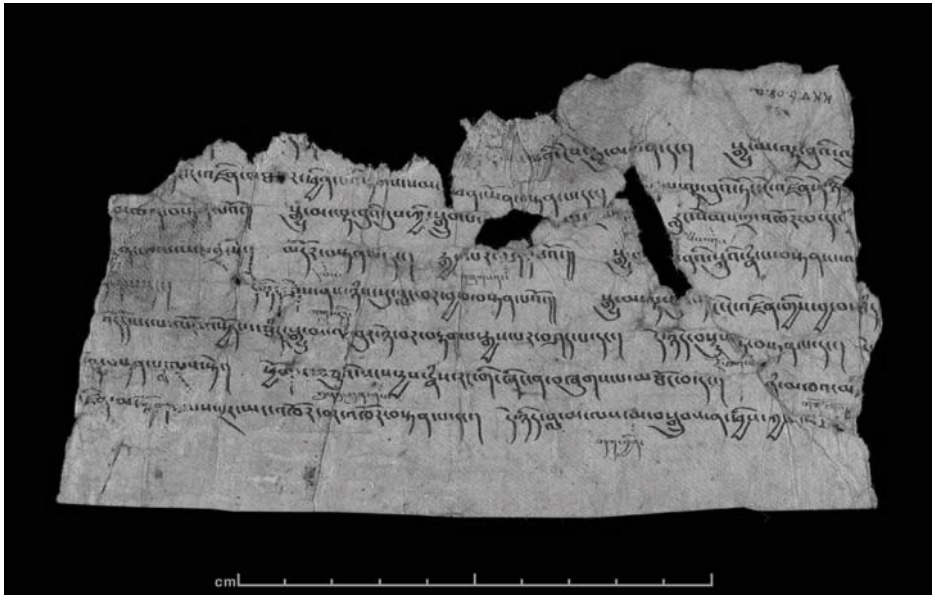

54 verso

Handwritten text in a medieval script, likely Latin or German, on a heavily damaged and torn parchment fragment. The text is arranged in several lines, with significant portions missing due to the physical state of the document. A small number '52' is visible near the top center of the fragment.

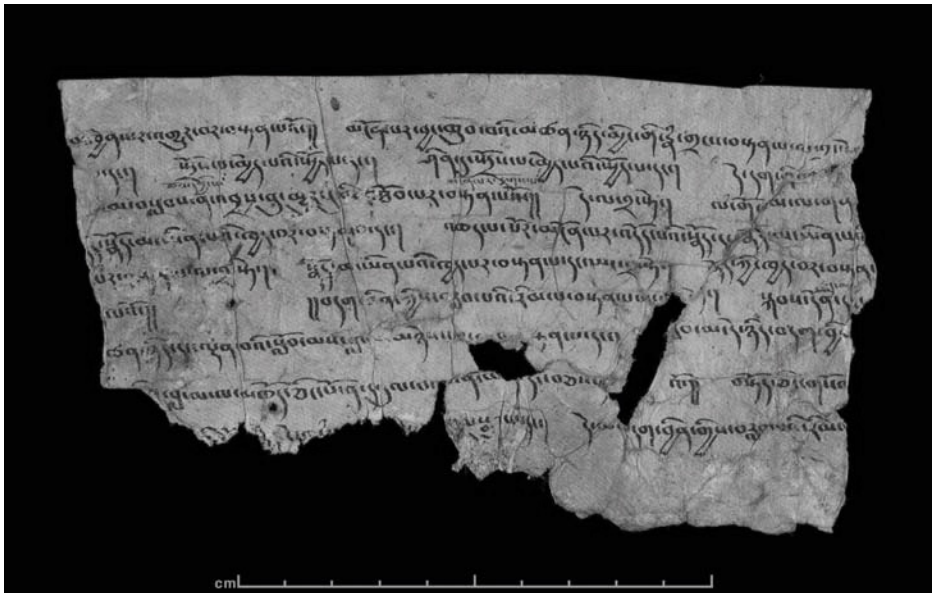

55 recto

Handwritten text in a medieval script, likely Latin or German, on a heavily damaged and torn parchment fragment. The text is arranged in several lines, with significant portions missing due to the physical state of the document.

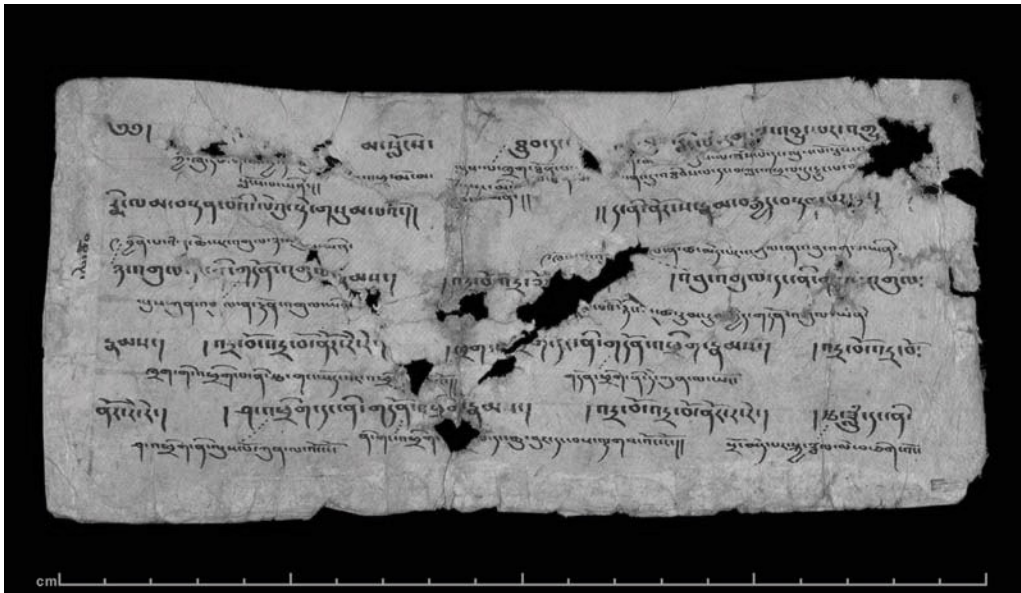

55 verso

56 recto

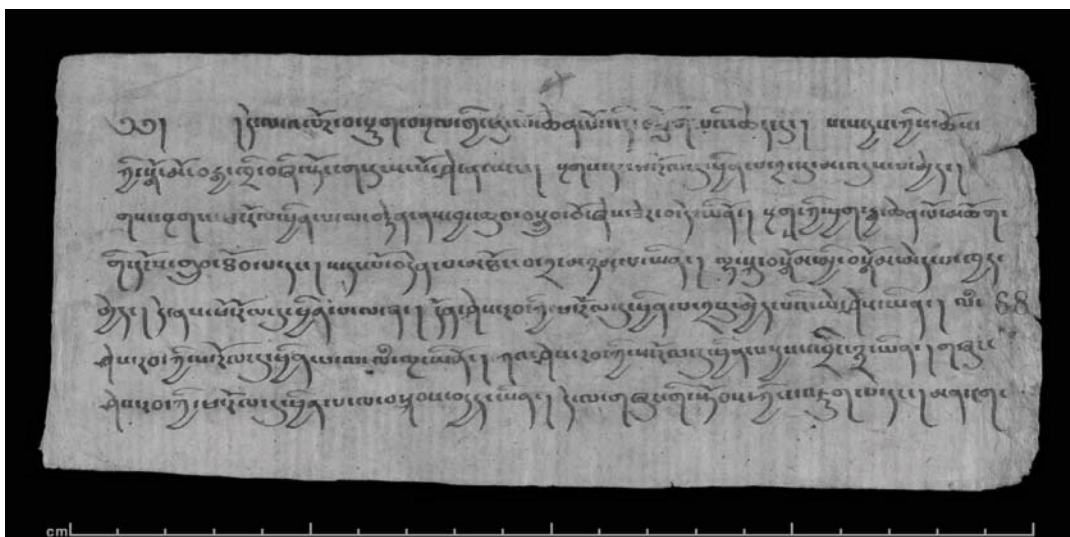

56 verso

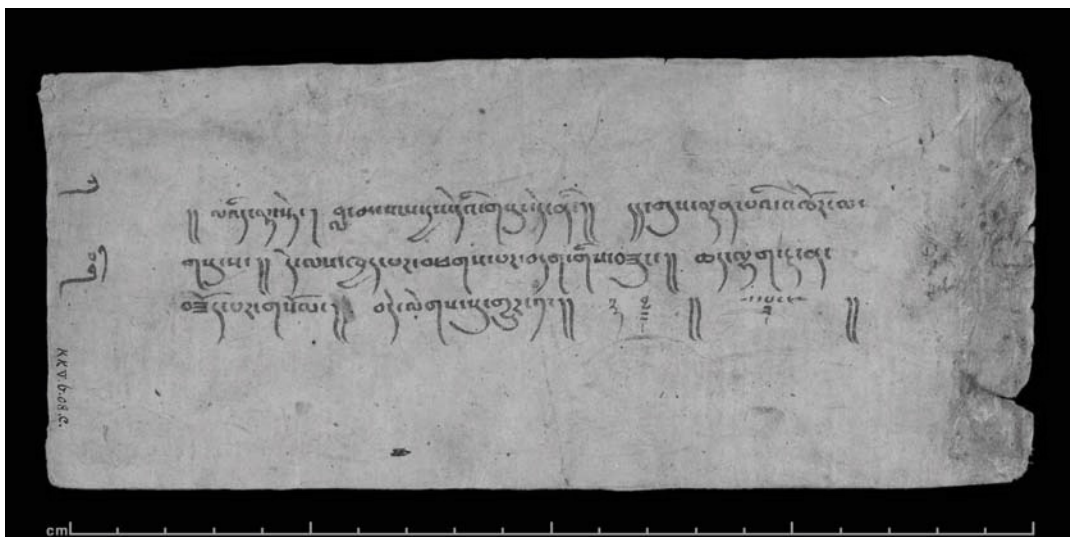

57 recto

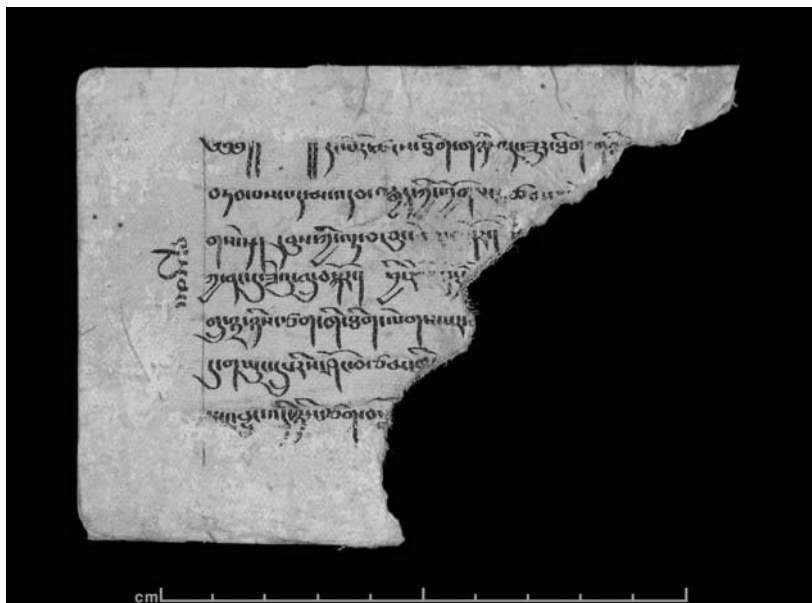

57 verso

58 recto

58 verso

59 recto

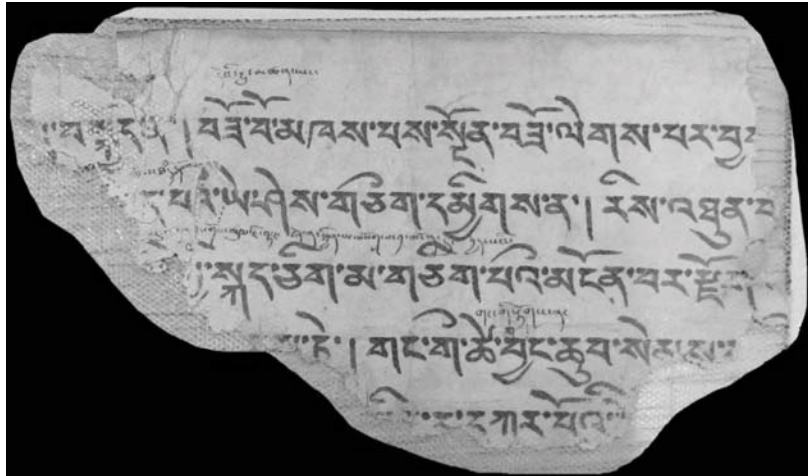

59 verso

Handwritten text in Tibetan script on a fragment of paper. The text is arranged in several lines, with some characters appearing to be in a different script or dialect. The fragment is irregularly shaped and shows signs of wear and tear.

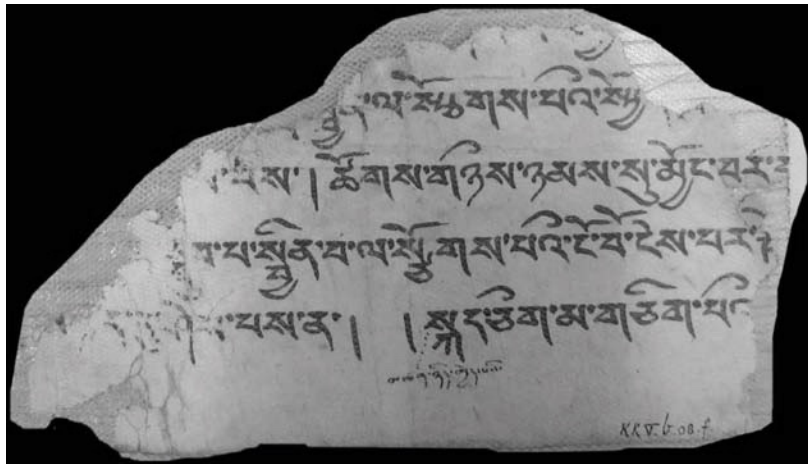

60 recto

Handwritten text in Tibetan script on a fragment of paper, likely the reverse side of the previous fragment. The text is arranged in several lines, with some characters appearing to be in a different script or dialect. The fragment is irregularly shaped and shows signs of wear and tear.

65 recto

65 verso

66 recto

66 verso

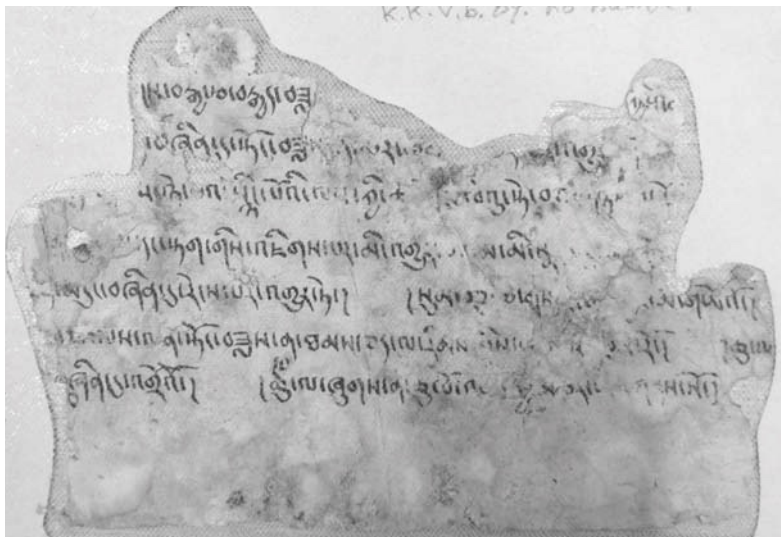

67 recto

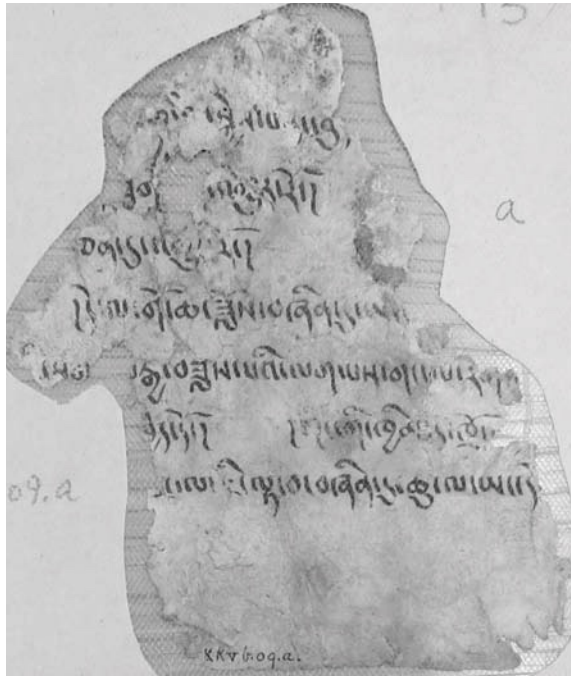

Handwritten text in an ancient script, likely Pāli, on a fragment of parchment. The text is arranged in approximately seven lines, with some characters appearing to be in a different script or dialect. The fragment is irregularly shaped and shows signs of age and wear.

68 recto

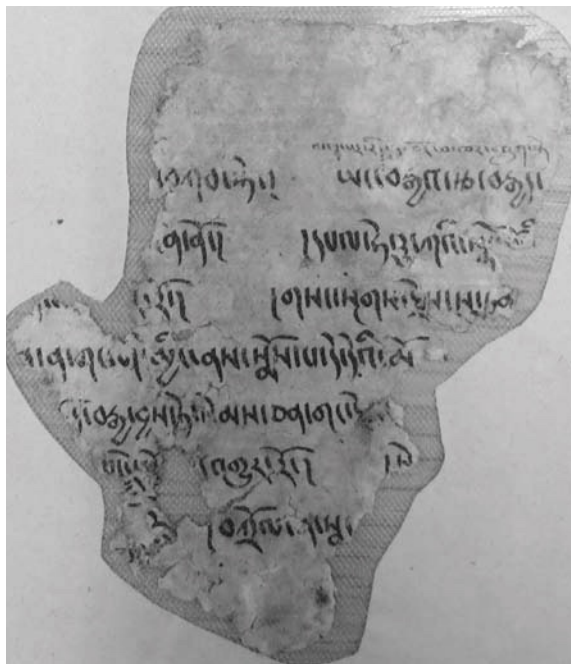

Handwritten text in an ancient script, likely Pāli, on the reverse side of a manuscript fragment. The text is arranged in approximately seven lines. A handwritten reference number "K.K.V.B. 07." is visible at the top of the fragment. The fragment is irregularly shaped and shows signs of age and wear.

68 verso

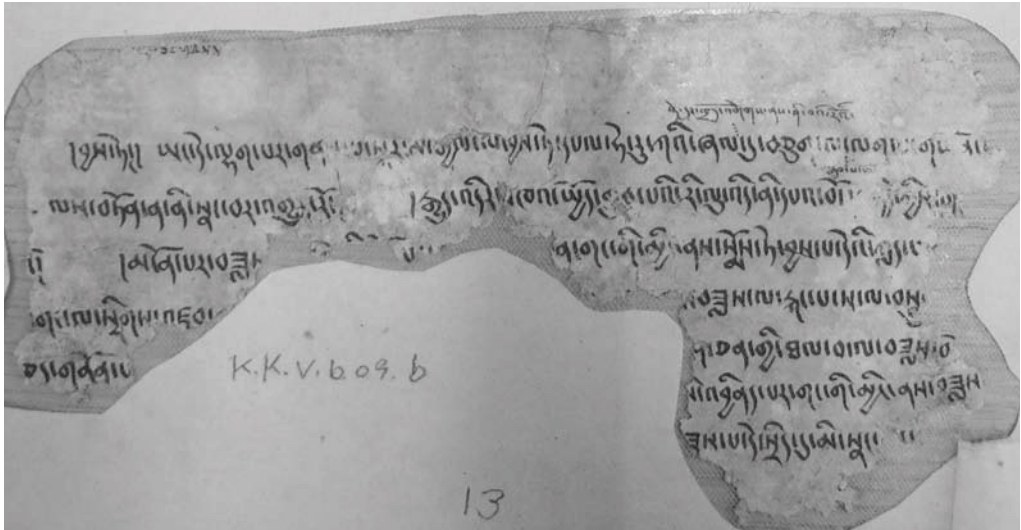

69 recto

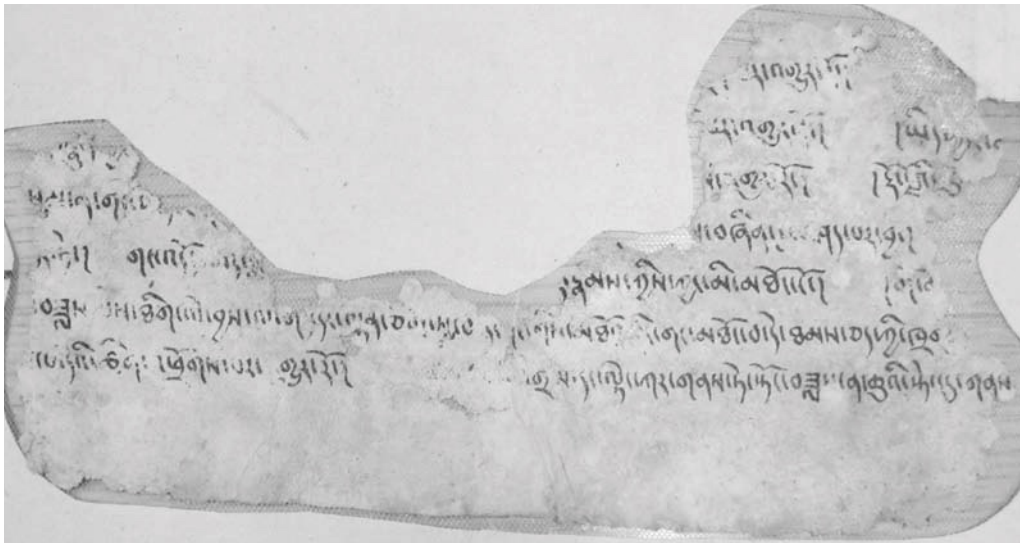

69 verso

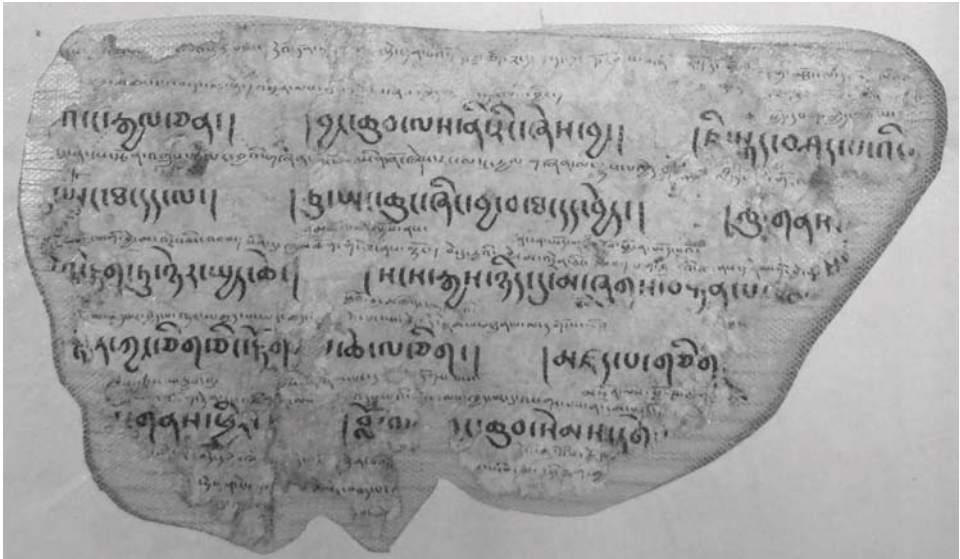

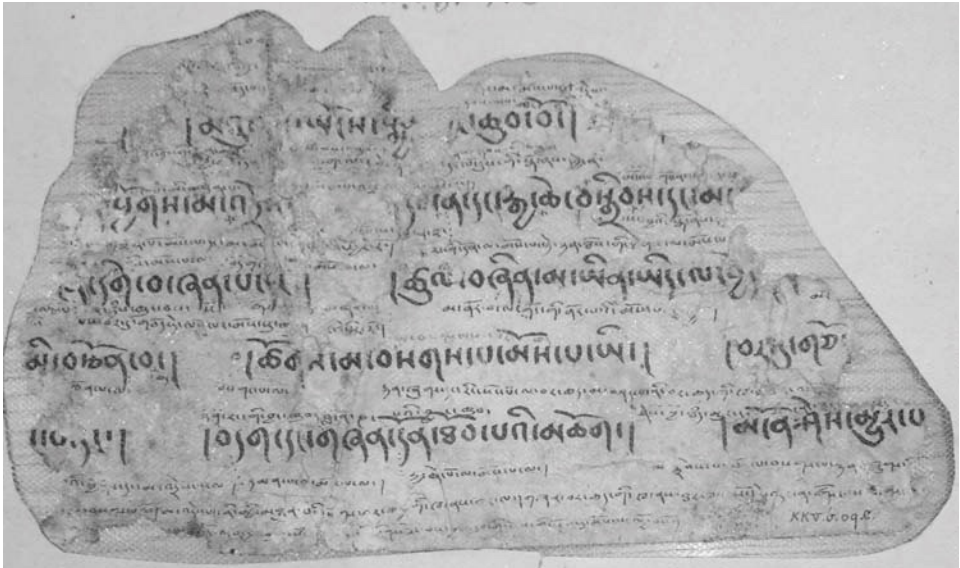

70 recto

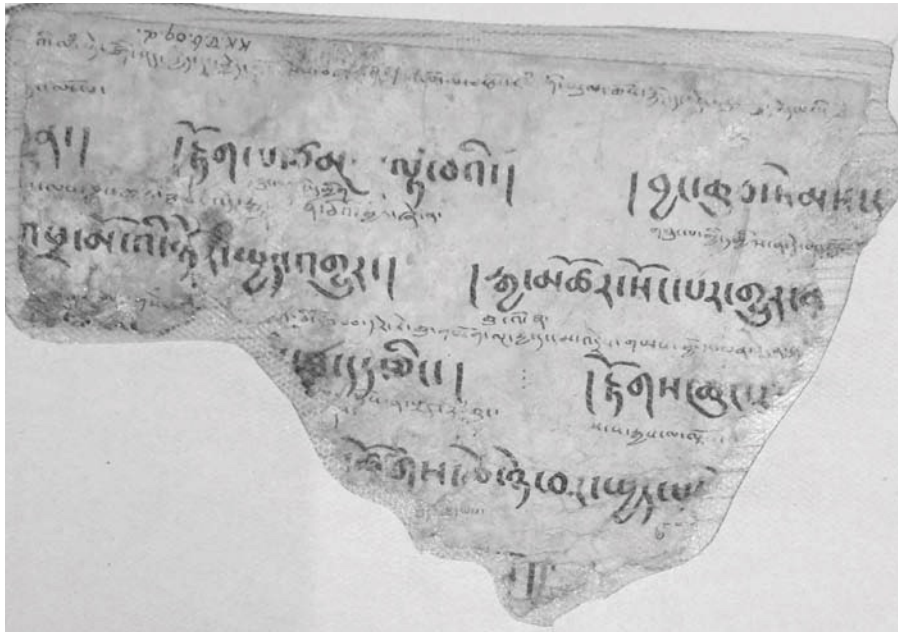

70 verso

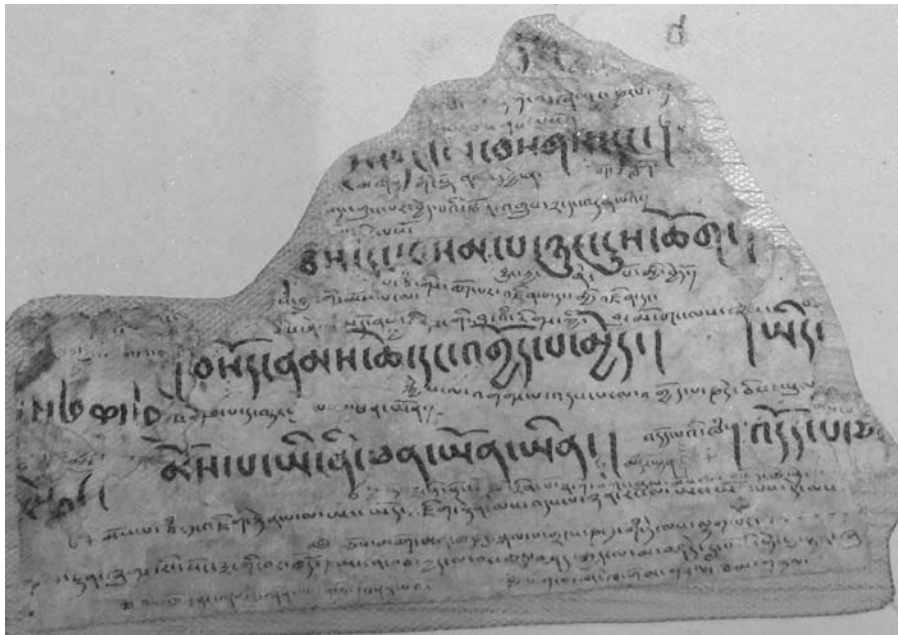

71 recto

71 verso

72 recto

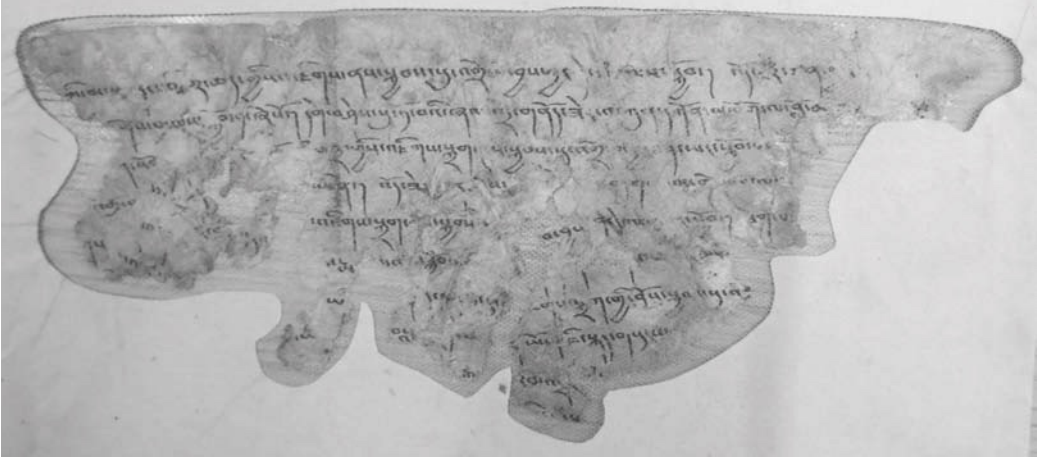

72 verso

Handwritten text in a cursive script, likely a medieval manuscript. The text is arranged in several lines, with some characters appearing to be ligatures or specific dialectal forms. The script is dark and somewhat faded, set against a light, textured background. The text is written in a cursive style, possibly a form of Gothic or a similar medieval script. The characters are closely spaced and often connected, making it difficult to read without specialized knowledge of the language and script. The text appears to be a list or a series of entries, possibly names or titles, written in a formal or official hand. The overall appearance is that of an aged, historical document.

xxv. 6. o. g. e.

73 recto

74 recto

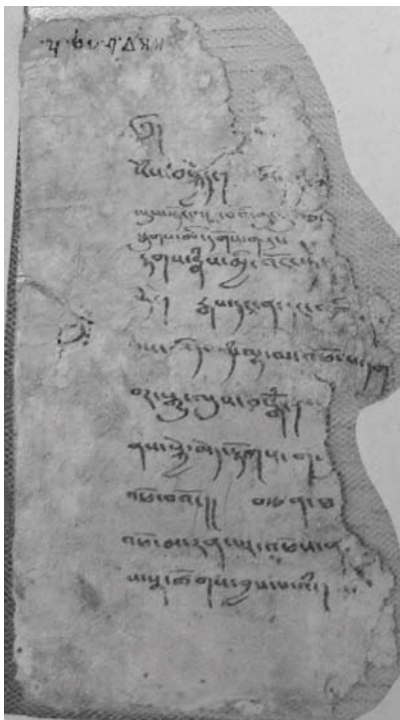

74 verso

Handwritten text in an ancient script, likely Georgian, on a parchment fragment. The text is arranged in approximately six horizontal lines. On the right side of the fragment, there is a vertical inscription: 809.6.VK.

90 verso

91 recto

91 verso

Handwritten text in a cursive script, likely a medieval manuscript. The text is arranged in two columns. The right column contains the main body of text, while the left column contains a shorter section. There are several lines of text in each column, with some lines starting with large initial letters. The script is dense and characteristic of the late Middle Ages.

92 recto

Handwritten text in a cursive script, likely a medieval manuscript. The text is arranged in two columns. The right column contains the main body of text, while the left column contains a shorter section. There are several lines of text in each column, with some lines starting with large initial letters. The script is dense and characteristic of the late Middle Ages.

122 verso

Handwritten text in a cursive script, likely a medieval manuscript, showing several lines of text on a page with significant water damage and staining. The text is written in a dark ink on a light-colored parchment or paper. The script is dense and difficult to decipher due to the damage and the cursive style. The text appears to be organized into several lines, with some words being larger and more prominent than others, possibly indicating initials or section markers. The overall appearance is that of an ancient, well-used document that has suffered from significant environmental damage over time.

145 verso

A photograph of a manuscript page, folio 146 recto. The page is filled with handwritten text in a dense, cursive script. The ink is dark, and the paper appears aged and slightly yellowed. There are some faint markings and a small number '31' written in the right margin. The text is arranged in several lines, with some larger initial letters or words.

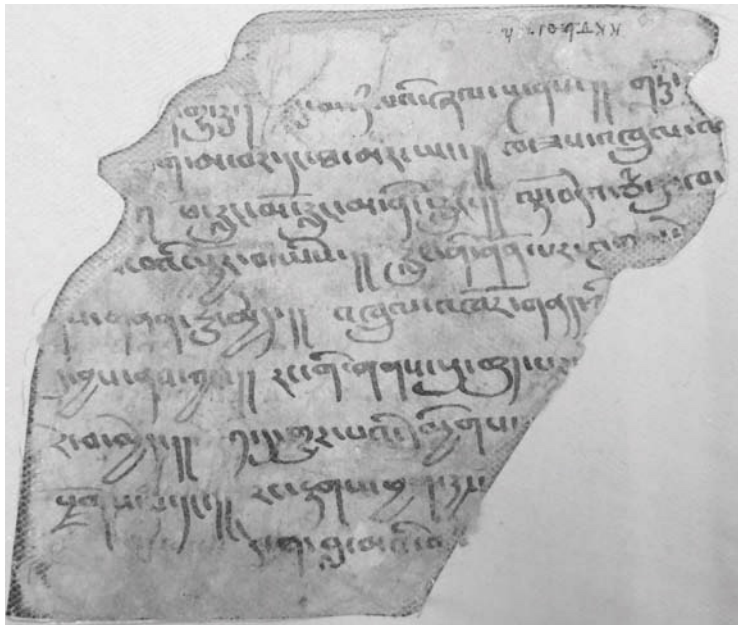

146 recto

A photograph of the reverse side of the manuscript page, folio 146 verso. The page contains handwritten text in the same cursive script as the recto side. The text is organized into lines, with some larger characters or initials. There is a small number '31' written in the upper left margin. The handwriting is consistent with the recto page, showing a highly stylized and compact script.

265 verso

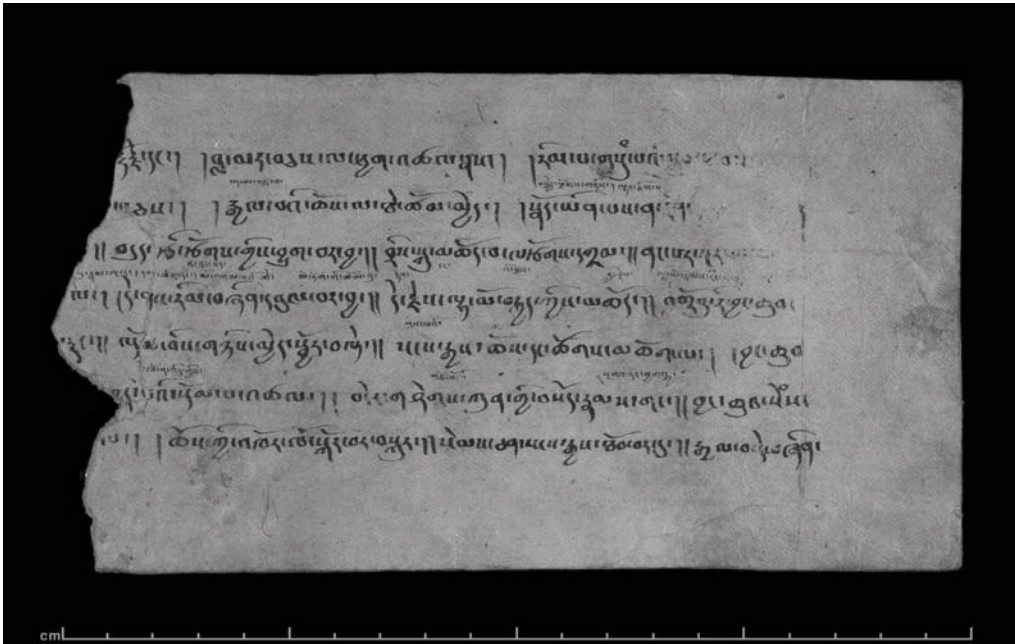

Handwritten text in a medieval script, likely Latin, on the recto side of a parchment leaf. The text is arranged in a single column and is significantly damaged by a large, irregular tear that runs vertically down the center of the page. The script is dense and appears to be a Gothic or similar medieval hand. The parchment is aged and shows some staining and wear.

266 recto

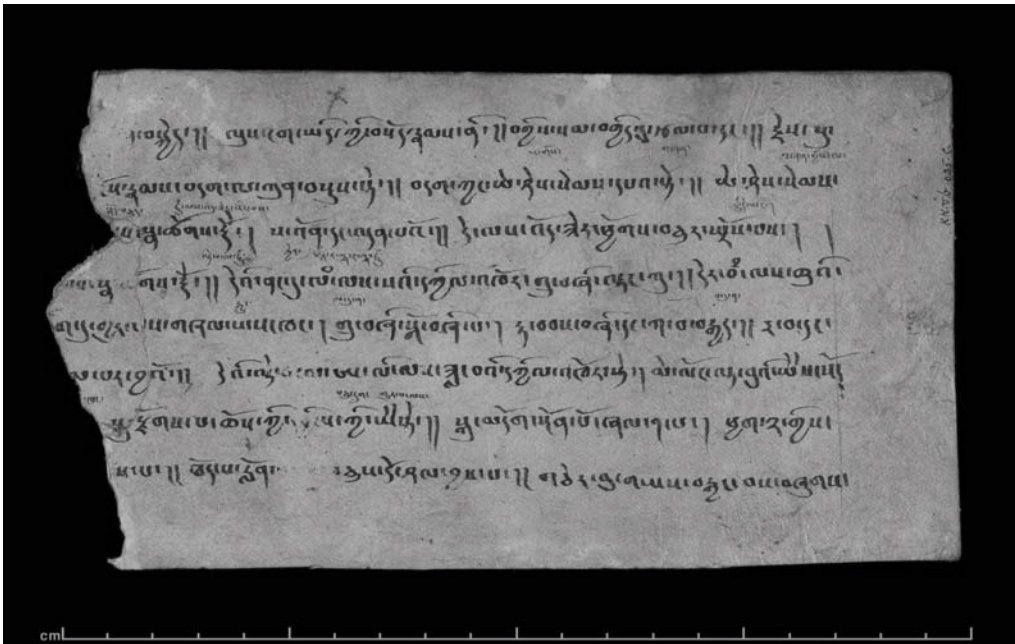

Handwritten text in a medieval script, likely Latin, on the verso side of a parchment leaf. The text is arranged in a single column and is significantly damaged by a large, irregular tear that runs vertically down the center of the page. The script is dense and appears to be a Gothic or similar medieval hand. The parchment is aged and shows some staining and wear.

268 recto

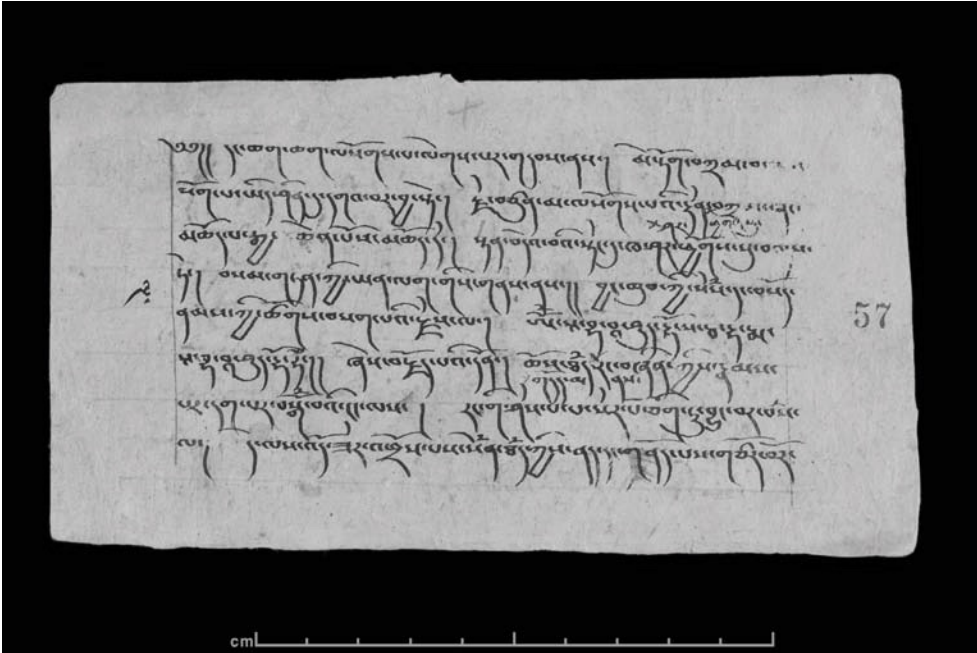

268 verso

Handwritten Burmese script on a rectangular piece of aged paper. The text is arranged in approximately 10 horizontal lines. The script is a traditional form of Burmese, likely from the 18th or 19th century. The paper shows signs of wear, including some staining and a small tear at the bottom right corner. The number '27' is written in the right margin.

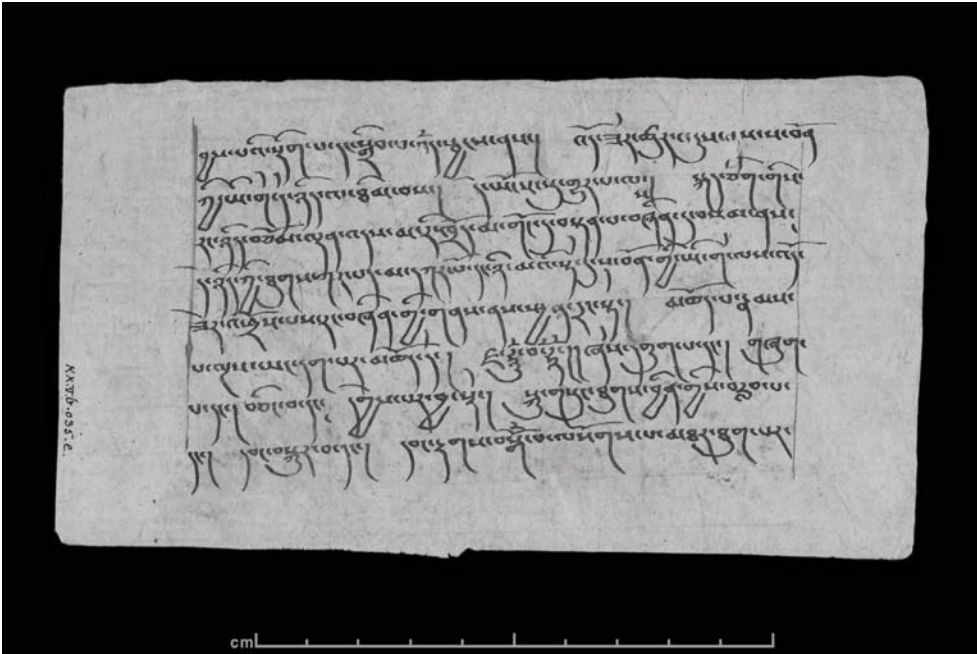

269 recto

Handwritten Burmese script on a rectangular piece of aged paper. The text is arranged in approximately 10 horizontal lines. The script is a traditional form of Burmese, likely from the 18th or 19th century. The paper shows signs of wear, including some staining and a small tear at the bottom right corner. The number '27' is written in the right margin.
